

Precise. Flexible. One-of-a-kind.

The new Weller WTQB1000 Rework System

Weller introduces a new SMD rework system, the WTQB1000, enabling the user to easily and efficiently perform desoldering, pad-cleaning, positioning and soldering. Due to an integrated camera, even the smallest parts can be manually placed and repaired with highest precision.

A user-friendly software, which can be easily installed on any personal computer, enables a

Features and Benefits

- > Camera supported positioning system enables high-precision work even on very small components
- > Full rework cycle capability meets highest repeatability and reproducibility of results
- > No optical calibration needed
- > Complete tools portfolio and exceptionally wide portfolio of accessories available

simple handling of the station. All rework profiles are individually adjustable and recallable.

The station is ESD Safe which prevents damage or degradation of sensitive components and enables safe usage in protected assembly areas.

WTQB1000 Rework Station

WTQB1000N	Rework Station 110V	USD List Price \$10,900.00	CAN List Price \$13,734.00

Technical Data

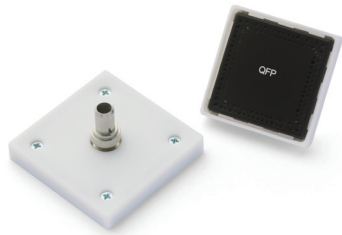

Dimensions	660 mm x 360 mm x 390 mm
Min. component size	1 mm x 1 mm
Max. component size	42 mm x 42 mm
Bottom heater	max. 2000 W (infrared)
Hot air tool	300 W
Recommended max. PCB size	200 mm x 260 mm
Weight excl. packaging	22 kg
Noise emission	without vacuum 58 dB/1 m with vacuum 62 dB/1 m
Protection class	Protection class I
