CRIMP BARREL, CRIMP INSERT AND  
CRIMP TOOL SELECTION PROCUDURE

SELECTION CHART AND CRIMP TOOLS

| Step | Description                                                                                                                                                                                    | Example                                                                                  |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| 1.   | Measure the outside cable diameter (3 times on different places at different angles)                                                                                                           | OD = 6.5mm                                                                               |
| 2.   | Strip the cable and remove the cable braiding                                                                                                                                                  |       |
| 3.   | Measure the diameter of the inner cable bundle including the foil                                                                                                                              | ID = 4.4mm                                                                               |
| 4.   | Select the crimp flange with a hole diameter next up to the cable bundle diameter                                                                                                              | PN 2-2308349-1, ID=4.5mm, OD=5.5mm                                                       |
| 5.   | Calculate the recommended barrel inner diameter with the following formula:<br><i>Recommended Inner crimp barrel diameter = OD of crimp flange + 2x(thickness of the cable jacket) + 0.2mm</i> | Thickness cable jacket = (6.5-4.4)/2=1.05mm<br>Barrel ID= 5.5mm + 2x1.05 + 0.2mm = 7.8mm |
| 6.   | Select the crimp barrel with the next size up                                                                                                                                                  | PN 1-2308350-7, ID=8.0mm, OD= 9.0mm                                                      |
| 7.   | Order the correct crimp tool + crimp insert using the crimp barrel selection matrix                                                                                                            | PN 1-2823557-1 & 1-2823558-3                                                             |

| Picture                                                                              | PN Crimp Barrel | Inner diameter | Outer diameter | PN Recommended crimp insert |
|--------------------------------------------------------------------------------------|-----------------|----------------|----------------|-----------------------------|
