NOTES

1. Molex recommends an extra perishable tooling kit be maintained at your facility.
2. Verify tooling alignment by manually cycling the press and Applicator before crimping under power. Check that all screws are tight.
3. Slugs, Terminals, Dirt and Oil should be kept clear of work area.
4. Wear safety glasses at all times.
5. For recommended maintenance refer to the FineAdjust Manual.
6. The Ultra Fit terminal has a special "stand-off" feature located on the carrier strip. This feature is designed to help reduce damage to the terminals, as the terminal reel is being handled. In the event of severe mishandling of the terminal reel, a portion of the stand-off features may become bent, and not allow the terminals to feed thru the applicator track. This portion of terminals should be cut free from the terminal reel, and discarded.
7. This applicator is not equipped with a carrier strip scrap cutter, due to the irregular shape of the stand-off feature.

CAUTION: This applicator should only be used in a press with a shut height of 135.8mm (5.346"). Tooling damage could result at a lower setting.

CAUTION: To prevent injury never operate this Applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire processing manufacturer's instruction manual.

CAUTION: Molex crimp specifications are valid only when used with Molex terminals, applicators and tooling.
