Features

RoHS-Compliant Product Low Insertion Loss: 0.4 dB Ultra Small Package: SOT26 Input IP3: +55 dBm Positive Control: 0/+3V @ 0.1 µA

General Description

The HMC221B(E) is a low-cost SPDT switch in a 6-lead SOT26 plastic package for use in general switching applications which require very low insertion loss and very small size. This device can control signals from DC to 3 GHz and is especially suited for 900 MHz, 1.8 - 2.2 GHz, and 2.4 GHz ISM applications with less than 1 dB loss. The design provides exceptional insertion loss performance, ideal for filter and receiver switching. RF1 and RF2 are reflective shorts when "Off". The two control voltages require a minimal amount of DC current and offer compatibility with most CMOS & TTL logic families. See HMC197B(E) for same performance in an alternate SOT26 pin-out.

HMC221B / 221BE

GaAs MMIC SOT26 SPDT SWITCH, DC - 3 GHz

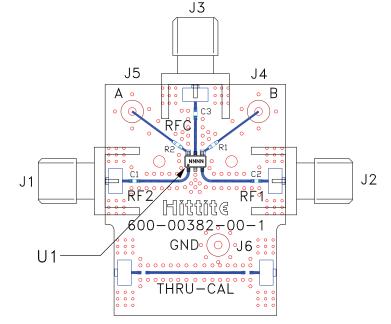

Typical Application Circuit

Notes:

- 1. Set logic gate and switch Vdd = +3V to +5V and use HCT series logic to provide a TTL driver interface.
- 2. Control inputs A/B can be driven directly with CMOS logic (HC) with Vdd of 5 to 8 Volts applied to the CMOS logic gates.
- 3. DC Blocking capacitors are required for each RF port as shown. Capacitor value determines lowest frequency of operation.
- 4. Highest RF signal power capability is achieved with Vdd = +8V and A/B set to 0/+8V.

List of Materials for Evaluation PCB EVAL01 - HMC221B [1]

Item	Description	
J1 - J3	PCB Mount SMA RF Connector	
J4 - J6	DC Pin	
C1 - C3	330 pF Capacitor, 0402 Pkg.	
R1, R2	1 kOhm Resistor, 0402 Pkg.	
U1	HMC221B / 221BE SPDT Switch	
PCB [2]	600-00382-00-1 Evaluation PCB	

[1] Reference this number when ordering complete evaluation PCB [2] Circuit Board Material: Rogers 4350

The circuit board used in the application should be generated with proper RF circuit design techniques. Signal lines at the RF port should have 50 Ohm impedance and the package ground leads and package bottom should be connected directly to the ground plane similar to that shown above. The evaluation circuit board shown above is available from Hittite Microwave Corporation upon request.
