## Static Shielding Bag - Metal-out

3M SCC 1500 metal-out static shielding bags are approved by major electronics manufacturers for use worldwide. Our transparent, metallized static shield bag structure is designed to provide a static safe environment for sensitive electronic devices. This bag also provides low charge retention and rapid static decay. Bags are lot coded for QC traceability. These bags are tested to meet or exceed certain electrical and physical requirements of ANSI/ESD S541, EIA 625, and to be ANSI/ESD S20.20 program compliant.

#### Material Structure

3M SCC 1500 flat and ZipTop static shielding bags are manufactured using a proprietary top coating. The top coating and metal layer provide low charge retention and Faraday Effect shielding of an Electrostatic Discharge (ESD) with the associated electrostatic fields. Polyester dielectric stops the current from ESD. Tribocharging is minimized by the specially processed polyethylene.
