

TL431 family

Adjustable precision shunt regulators

Rev. 6 — 9 January 2019

Product data sheet

1. Product profile

1.1. General description

Three-terminal shunt regulator family with an output voltage range between $V_{ref} = 2.495\text{ V}$ and 36 V , to be set by two external resistors.

Table 1. Product overview

| Reference voltage tolerance (V_{ref}) | Temperature range (T_{amb}) | | | Pinning configuration (see Table 5) |
|---|---------------------------------|-----------------|------------------|-------------------------------------|
| | 0 °C to 70 °C | -40 °C to 85 °C | -40 °C to 125 °C | |
| 2.0 % | TL431CDBZR | TL431IDBZR | TL431QDBZR | normal pinning |
| | | | TL431FDT | normal pinning |
| | | | TL431MFDT | mirrored pinning |
| 1.0 % | TL431ACDBZR | TL431AIDBZR | TL431AQDBZR | normal pinning |
| | | | TL431AFDT | normal pinning |
| | | | TL431AMFDT | mirrored pinning |
| 0.5 % | TL431BCDBZR | TL431BIDBZR | TL431BQDBZR | normal pinning |
| | | | TL431BFDT | normal pinning |
| | | | TL431BMFDT | mirrored pinning |

1.2. Features and benefits

- Programmable output voltage up to 36 V
- Three different reference voltage tolerances:
 - Standard grade: 2 %
 - A-Grade: 1 %
 - B-Grade: 0.5 %
- Typical temperature drift: 9 mV (in a range of 0 °C up to 70 °C)
- Low output noise
- Typical output impedance: $0.2\ \Omega$
- Sink current capability: 1 mA to 100 mA
- AEC-Q100 qualified (grade 1)

1.3. Applications

- Shunt regulator
- Precision current limiter
- Precision constant current sink
- Isolated feedback loop for Switch Mode Power Supply (SMPS)

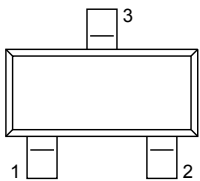

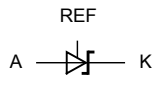

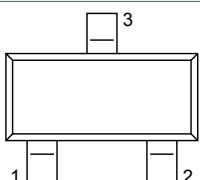

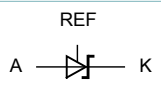

1.4. Quick reference data

Table 2. Quick reference data

| Symbol | Parameter | Conditions | Min | Typ | Max | Unit |
|-----------|--------------------------|---|-----------|------|------|------|
| V_{KA} | cathode-anode voltage | | V_{ref} | - | 36 | V |
| I_K | cathode current | | 1 | - | 100 | mA |
| V_{ref} | reference voltage | $V_{KA} = V_{ref}; I_K = 10 \text{ mA};$ $T_{amb} = 25 \text{ }^\circ\text{C}$ | | | | |
| | • Standard-Grade (2.0 %) | | 2440 | 2495 | 2550 | mV |
| | • A-Grade (1.0 %) | | 2470 | 2495 | 2520 | mV |
| | • B-Grade (0.5 %) | | 2483 | 2495 | 2507 | mV |

2. Pinning information

Table 3. Pinning

| Pin | Symbol | Description | Simplified outline | Graphic symbol |
|---|--------|-------------|--|--|
| SOT23; normal pinning: All types without MFDT ending | | | | |
| 1 | K | cathode |  |  006aab355 |
| 2 | REF | reference | | |
| 3 | A | anode | | |
| SOT23; mirrored pinning: All types with MFDT ending | | | | |
| 1 | REF | reference |  |  006aab355 |
| 2 | K | cathode | | |
| 3 | A | anode | | |

3. Ordering information

Table 4. Ordering information

| Type number | Package | | Version |
|-------------|----------|--|---------|
| | Name | Description | |
| TL431CDBZR | TO-236AB | plastic surface-mounted package; 3 leads | SOT23 |
| TL431IDBZR | | | |
| TL431QDBZR | | | |
| TL431FDT | | | |
| TL431MFDT | | | |
| TL431ACDBZR | | | |
| TL431AIDBZR | | | |
| TL431AQDBZR | | | |
| TL431AFDT | | | |
| TL431AMFDT | | | |
| TL431BCDBZR | | | |
| TL431BIDBZR | | | |
| TL431BQDBZR | | | |
| TL431BFDT | | | |
| TL431BMFDT | | | |

4. Marking

Table 5. Marking codes

| Type number | Marking code [1] | Type number | Marking code [1] |
|-------------|------------------|-------------|------------------|
| TL431CDBZR | CA% | TL431AFDT | AS% |
| TL431IDBZR | CB% | TL431AMFDT | AV% |
| TL431QDBZR | CC% | TL431BCDBZR | CG% |
| TL431FDT | AR% | TL431BIDBZR | CH% |
| TL431MFDT | AU% | TL431BQDBZR | CJ% |
| TL431ACDBZR | CD% | TL431BFDT | AT% |
| TL431AIDBZR | CE% | TL431BMFDT | AW% |
| TL431AQDBZR | CF% | - | - |

[1] % = placeholder for manufacturing site code.

5. Functional diagram

The TL431 family comprises a range of 3-terminal adjustable shunt regulators, with specified thermal stability over applicable automotive and commercial temperature ranges. The output voltage can be set to any value between V_{ref} (approximately 2.5 V) and 36 V with two external resistors (see Figure 8). These devices have a typical output impedance of 0.2 Ω . Active output circuitry provides a very sharp turn-on characteristic, making these devices excellent replacements for Zener diodes in many applications like on-board regulation, adjustable power supplies and switching power supplies.

Fig. 1. Functional diagram

6. Limiting values

Table 6. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134).

| Symbol | Parameter | Conditions | Min | Max | Unit | |
|-----------|--------------------------|-----------------------------|-------|------|------|----|
| V_{KA} | cathode-anode voltage | | - | 37 | V | |
| I_K | cathode current | | -100 | 150 | mA | |
| I_{ref} | reference current | | -0.05 | 10 | mA | |
| P_{tot} | total power dissipation | $T_{amb} \leq 25\text{ °C}$ | [1] | - | 350 | mW |
| | | | [2] | - | 580 | mW |
| | | | [3] | - | 950 | mW |
| T_j | junction temperature | | - | 150 | °C | |
| T_{amb} | ambient temperature | | | | | |
| | TL431XCDBZR | | 0 | +70 | °C | |
| | TL431XIDBZR | | -40 | +85 | °C | |
| | TL431XQDBZR TL431XFDT | | -40 | +125 | °C | |
| T_{stg} | storage temperature | | -65 | +150 | °C | |

- [1] Device mounted on an FR4 Printed-Circuit Board (PCB), single-sided copper, tin-plated and standard footprint.
- [2] Device mounted on an FR4 PCB, single-sided copper, tin-plated, mounting pad for anode 1 cm².
- [3] Device mounted on a ceramic PCB, Al₂O₃, standard footprint.

Fig. 2. Power derating curves

Table 7. ESD maximum ratings

$T_{amb} = 25\text{ °C}$ unless otherwise specified.

| Symbol | Parameter | Conditions | Min | Max | Unit |
|-----------|---------------------------------|--------------------------------|-----|-----|------|
| V_{ESD} | electrostatic discharge voltage | MIL-STD-883 (human body model) | - | 4 | kV |

7. Recommended operating conditions

Table 8. Operating conditions

| Symbol | Parameter | Conditions | Min | Max | Unit |
|----------|-----------------------|------------|-----------|-----|------|
| V_{KA} | cathode-anode voltage | | V_{ref} | 36 | V |
| I_K | cathode current | | 1 | 100 | mA |

8. Thermal characteristics

Table 9. Thermal characteristics

| Symbol | Parameter | Conditions | Min | Typ | Max | Unit | |
|----------------|--|-------------|-----|-----|-----|------|-----|
| $R_{th(j-a)}$ | thermal resistance from junction to ambient | in free air | [1] | - | - | 360 | K/W |
| | | | [2] | - | - | 216 | K/W |
| | | | [3] | - | - | 132 | K/W |
| $R_{th(j-sp)}$ | thermal resistance from junction to solder point | | [4] | - | - | 50 | K/W |

- [1] Device mounted on an FR4 PCB, single-sided copper, tin-plated and standard footprint.
 [2] Device mounted on an FR4 PCB, single-sided copper, tin-plated, mounting pad for anode 1 cm².
 [3] Device mounted on a ceramic PCB, Al₂O₃, standard footprint.
 [4] Soldering point of anode.

9. Characteristics

Table 10. Characteristics
 $T_{amb} = 25\text{ °C}$ unless otherwise specified.

Nexperia takes no responsibility for the content in this document if provided by an information source outside of Nexperia.

In no event shall Nexperia be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, Nexperia's aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the Terms and conditions of commercial sale of Nexperia.

Right to make changes — Nexperia reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use in automotive applications — This Nexperia product has been qualified for use in automotive applications. Unless otherwise agreed in writing, the product is not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or

equipment, nor in applications where failure or malfunction of an Nexperia product can reasonably be expected to result in personal injury, death or severe property or environmental damage. Nexperia and its suppliers accept no liability for inclusion and/or use of Nexperia products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.

Quick reference data — The Quick reference data is an extract of the product data given in the Limiting values and Characteristics sections of this document, and as such is not complete, exhaustive or legally binding.

Applications — Applications that are described herein for any of these products are for illustrative purposes only. Nexperia makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using Nexperia products, and Nexperia accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the Nexperia product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

Nexperia does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using Nexperia products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). Nexperia does not accept any liability in this respect.

Limiting values — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

Terms and conditions of commercial sale — Nexperia products are sold subject to the general terms and conditions of commercial sale, as published at <http://www.nexperia.com/profile/terms>, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. Nexperia hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of Nexperia products by customer.

No offer to sell or license — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
