

LTC3600

16V, 1.5A Synchronous Step-Down Regulator with Programmable Reference

DESCRIPTION

Demonstration circuit DC1667A is a step-down DC/DC converter using LTC[®]3600 monolithic synchronous buck regulator. DC1667A has an input voltage range of 4.5V to 15V, and is capable of delivering up to 1.5A of output current. The output voltage of the DC1667 can be set by a single resistor from 0V to $(V_{IN} - 0.5)V$. At light load conditions, DC1667 can operate in discontinuous mode to improve the efficiency. During shutdown mode, LTC3600 consumes less than 1 μ A. The switching frequency of LTC3600 is programmable from 200kHz to 4MHz. DC1667A uses low profile surface mount components.

These features and the availability of LTC3600 in a 12-lead DFN/MSOP package, make it ideal for use in point-of-load power supplies, battery-powered equipments and voltage tracking systems. The LTC3600 data sheet must be read in conjunction with this demo manual for working on or modifying the demo circuit DC1667A.

Design files for this circuit board are available at <http://www.linear.com/demo/DC1667A>

PERFORMANCE SUMMARY $(T_A = 25^\circ\text{C})$

PARAMETER	CONDITIONS	VALUE
Input Voltage Range		4.5V to 15V
Default Output Voltage V_{OUT}	$V_{IN} = 4.5V$ to 15V, $I_{OUT} = 0A$ to 1.5A, JP10: CCM	$1.215V \pm 2\%$ (1.19V to 1.24V)
Maximum Continuous Output Current		1.5A
Default Operating Frequency		1MHz
Typical Output Voltage Ripple	$V_{IN} = 5V$, $V_{OUT} = 1.2V$, $I_{OUT} = 1.5A$, $f_{SW} = 1MHz$	<10mV (See Figure 4)
Efficiency	$V_{IN} = 5V$, $V_{OUT} = 1.2V$, $I_{OUT} = 1.5A$, $f_{SW} = 1MHz$	78% (See Figure 3)

DEMO MANUAL DC1667A

QUICK START PROCEDURE

Demonstration circuit DC1667A is easy to set up to evaluate the performance of the LTC3600. Please refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

1. Place jumpers in the following positions for a typical 1.2V output application:

JP2	JP7	JP8	JP9	JP10
1.2V	COMP	PGOOD	RUN	MODE/SYNC
1.2V	EXT	DIS	OFF	CCM

2. With power off, connect the input power supply, load and meters as shown in Figure 1. Preset the load to 0A and V_{IN} supply to 5V.

3. Turn on the power supply at the input. Measure and make sure the input voltage is 5V. Turn on the circuit by inserting the shunt in header JP9 to the ON position. The output voltage should be $1.215V \pm 2\%$ (1.19V to 1.24V).
4. Once the proper output voltage is established, adjust the load within the operating range and observe the output voltage regulation, output voltage ripple, efficiency and other parameters. Refer to Figure 2 for proper input/output voltage ripple measurement.
5. To select other output voltages, LTC3600 has to be shut down by putting RUN pin jumper to the OFF position or turning off the input supply. After the IC is shut down, move the shunt to other output voltage selections, such as 1.8V or 3.3V, and repeat tests 1 through 4. The output voltage tolerance should remain at $V_{OUT} \pm 2\%$.

DEMO MANUAL DC1667A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
