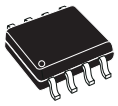
TS922, TS922A

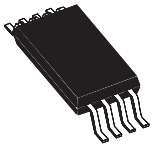
Datasheet

Rail-to-rail, high output current, dual operational amplifier

Flip-chip with backcoating



SO8



TSSOP8

Product status link
TS922 and TS922A

Features

- Rail-to-rail input and output
- Low noise: 9 nV/√Hz
- Low distortion
- High output current: 80 mA (able to drive 32 Ω loads)
- High-speed: 4 MHz, 1 V/µs
- Operating from 2.7 to 12 V
- Low input offset voltage: 900 µV max. (TS922A)
- ESD internal protection: 2 kV
- Latch-up immunity

Applications

- Line drivers and actuator drivers
- Portable speakers
- Instrumentation with low noise as key factor
- Multimedia systems and portable equipments

Description

The TS922 and the TS922A devices are rail-to-rail dual BiCMOS operational amplifiers optimized and fully specified for 3 V and 5 V operations. These devices have high output currents which allow low-load impedances to be driven.

Very low noise, low distortion, low offset, and a high output current capability make these devices an excellent choice for high quality, low voltage, or battery operated audio systems.

The devices are stable for capacitive loads up to 500 pF.

1 Pin diagrams

Figure 1. Pinout for Flip-chip package (top view)

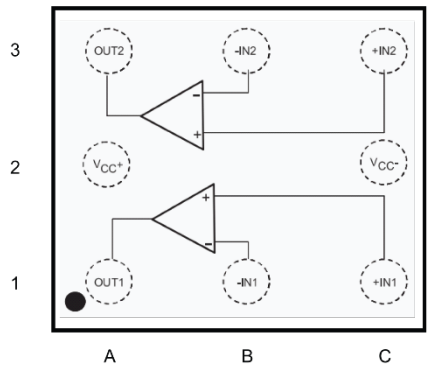


Figure 2. Pin connections for SO8 and TSSOP8 (top view)

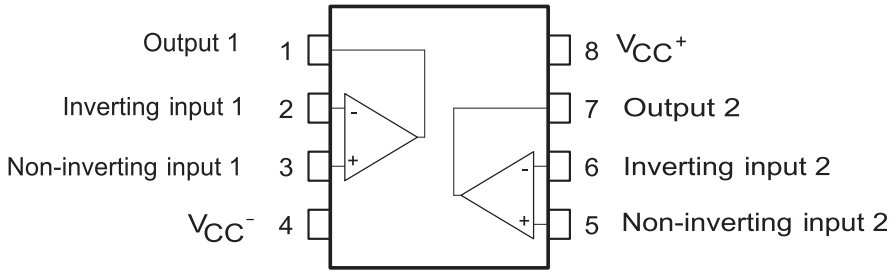

2 Absolute maximum ratings and operating conditions

Table 1. Absolute maximum ratings (AMR)

Symbol	Parameter		Value	Unit
V_{CC}	Supply voltage (1)		14	V
V_{id}	Differential input voltage (2)		±1	
V_{in}	Input voltage (3)		(V_{CC-}) - 0.3 to (V_{CC+}) + 0.3	
T_{stg}	Storage temperature		-65 to 150	°C
T_j	Maximum junction temperature		150	
—	Soldering temperature (10 s), leaded version		250	
—	Soldering temperature (10 s), unleaded version		260	
R_{thja}	Thermal resistance junction-to-ambient (4)	Flip-chip	90	°C/W
		SO8	125	
		TSSOP8	120	
R_{thjc}	Thermal resistance junction-to-case (4)	SO8	40	
		TSSOP8	37	
ESD	HBM: human body model (5)		2000	V
	MM: machine model (6)		120	
	CDM: charged device model (7)		1500	
—	Latch-up immunity		200	mA
—	Output short-circuit duration		See note (8)	

1. *All voltage values, except the differential voltage are with respect to network ground terminal.*
2. *The differential voltage is the non-inverting input terminal with respect to the inverting input terminal. If V_{id} > ±1 V, the maximum input current must not exceed ±1 mA. In this case (V_{id} > ±1 V), an input series resistor must be added to limit the input current.*
3. *Do not exceed 14 V.*
4. *Short-circuits can cause excessive heating. Destructive dissipation can result from simultaneous short-circuits on all amplifiers. These values are typical.*
5. *Human body model: 100 pF discharged through a 1.5 kΩ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.*
6. *Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5 Ω). This is done for all couples of pin combinations with other pins floating.*
7. *Charged device model: all pins and plus package are charged together to the specified voltage and then discharged directly to ground.*
8. *There is no short-circuit protection inside the device: short-circuits from the output to V_{CC} can cause excessive heating. The maximum output current is approximately 80 mA, independent of the magnitude of V_{CC}. Destructive dissipation can result from simultaneous short-circuits on all amplifiers.*

Table 2. Operating conditions

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage	2.7 to 12	V
V_{icm}	Common mode input voltage range	(V_{CC-}) - 0.2 to (V_{CC+}) + 0.2	
T_{oper}	Operating free air temperature range	-40 to 125	°C

3 Electrical characteristics

Table 3. Electrical characteristics measured at V_{CC} = 3 V, V_{CC}- = 0 V, V_{icm} = V_{CC}/2, T_{amb} = 25 °C, and R_L connected to V_{CC}/2 (unless otherwise specified)

Symbol	Parameter	Test conditions	Min.	Typ.	Max.	Unit
V_{io}	Input offset voltage	TS922			3	mV
		TS922A			0.9	
		TS922EIJT			1.5

Revision history

Table 8. **Document revision history**

Date	Revision	Changes
01-Feb-2001	1	First release.
01-Jul-2004	2	Flip-chip package inserted in the document.
02-May-2005	3	Modifications in AMR Table 1 (explanation of V_{id} and V_i limits, ESD MM and CDM values added, R_{thja} added).
01-Aug-2005	4	PPAP references inserted in the datasheet, see Table 8.
01-Mar-2006	5	TS922EIJT part number inserted in the datasheet, see Table 8.
26-Jan-2007	6	Modifications in AMR Table 1 (R_{thjc} added), parameter limits on full temperature range added in Table 3 and Table 4.
12-Nov-2007	7	Added notes on ESD in AMR table. Re-formatted package information. Added notes for automotive grade in order codes table.
02-Feb-2010	8	Document reformatted. Added root part number TS922A on cover page. Removed TS922AIYD order code from Table 8.
15-Jan-2013	9	Added MiniSO8 package. Modified test conditions for CMR in Table 3 and Table 4. Replaced V_{DD} by V_{CC-} in title of Table 3, Table 4, and Table 5. Updated titles of Figure 7 to Figure 12 (added conditions to differentiate them). Removed TS922IYD device from Table 8. Minor corrections throughout document.
04-Jun-2013	10	Features: updated package information for Flip-chip Figure 2: Updated title Table 1: updated footnotes 5, 6, and 7 Table 3 and Table 4: replaced DVio with ΔVio/ΔT Figure 14: added backcoating to package information Figure 16: updated footnote 3 Table 8: updated package information for Flip-chip
27-Jun-2013	11	Figure 14: updated to include new height for backcoating
20-Jan-2016	12	Updated document layout Removed MiniSO8 and DIP8 packages Updated cover image: removed J, D (plastic micropackage), and P (thin shrink small outline package) respectively from Flip-chip with backcoating, SO8, and TSSOP packages. Table 6: updated SO8 information for min “k” parameter (mm dimensions) Table 7: updated “aaa” information. These are “typ” not "max" values. Table 8: "Order codes": removed following order codes: TS922IST, TS922AIST, TS922IN, TS922IYST. TS922AIYST, and TS922IJT.

Date	Revision	Changes
20-Jul-2018	13	Updated features and applications in cover page. Updated Figure 1. Pinout for Flip-chip package (top view). Updated Section 6 Ordering information. Removed "Macromodel" section. Minor text changes.
