

## Advantages of the Class 6 Solid State Relay

### The Complete System Solution!

Optional Heat Sink  
(SSR-HS-1)  
Section 3 p.20

Optional Thermal Pad  
(SSR-TP-1)  
Section 3 p.21

We at Magnecraft strive to be your one-stop-shop for all of your solid state relay needs. The new line of 6 series solid-state relays give industrial relay users an energy-efficient current switching alternative. Depending on the application, these solid-state relays offer a number of advantages over electromechanical relays, including longer life cycles, less energy consumption and reduced maintenance costs. This is why great care and attention was given when developing the next generation of "Hockey Puck" style SSRs. These new SSRs will be finger-safe, fit a pre-cut heat transfer thermal pad (sold separately) and have the ability to be mounted onto a factory tested pre-drilled and tapped heat sink (sold separately).

Magnecraft's expertise in both SSR design and thermal management enables us to provide customers with a solution to their solid state relay requirements. This solution comes ready-to-use, virtually eliminating in-house assembly and complex heat sink calculations. Furthermore, each SSR, thermal pad (sold separately) and heat sink assembly (sold separately) utilizes the reliability and technology only available in our 6 series solid state relays. These features, coupled with Magnecraft's superior customer service and engineering support team, provide our customers with a level of convenience not easily found in the market today!

Evolut

Legacy

The Class 6 is also available with Blade Terminals.

The new finger-safe Class 6\* "Hockey Puck" Style Solid State Relay (SSR) expands and enhances the current Magnecraft Solid State Relay product line.

This product features a finger-safe cover and LED Status Indicator. The optically coupled circuitry isolates the input from the output to give pure solid state performance. This product carries with it agency certifications from UL, CSA, and CE.

\*Available for products up to 40 Amps (AC Load) and 12 Amps (DC Load).

**Finger Safe**  
Protects Operators from live circuits.

**Input Indication**  
Green LED.

**Optically Coupled Circuit**  
NO Interference between separate circuits.

**Solid State Circuitry**  
No Moving Parts Involved.

**Internal Snubber**  
Protects from Transients.

## General Specifications (@ 25° C) (UL 508)

		New Part #	6210AXXSZ5-AC90
		Superceding Part #	6210ASX-1
Output Characteristics		Units	
Number and type of Contacts			SPST-NO
Switching Device			SCR (2)
Current rating		A	10
Switching voltage		V	24....280 AC
Switching Type			Zero Cross
Maximum Rate of Rise Off State Voltage (dv/dt)		V/us	200
Incandescent Lamp Ampere Rating (rms)		A	8
Motor Load Rating (rms)		A	4.5
Min. Load current to maintain on		mA	50
Non-Repetitive Surge Current (1 cycle)		A	83
Max. RMS overload current (1 second)		A	24
Max. Off state leakage current (rms)		mA	8
Peak Blocking Voltage		Vpk	600
Typical On State Voltage Drop (rms)		V	1.6 AC
Max. On State Voltage Drop (rms)		V	1.6 AC
Maximum I <sup>2</sup> T for Fusing (A <sup>2</sup> )			72
Input Characteristics			
Voltage Range		V	90...280 AC/80...140 DC
Must Release Voltage		V	10 AC
Nominal Input Impedance		Ω	13K
Typical Input Current @ 5VDC or 240VAC		mA	20
Reverse Polarity Protection			N/A
Performance Characteristics			
Operating Time (response time)	On	ms	8.3
	Off	ms	8.3
Rated Insulation Voltage	Input to Output	V	4000 AC
	Terminals to Chassis	V	4000 AC
Environment			
Product certifications	Standard version		UR, CSA, CE
Ambient air temperature around the device	Storage	°C	-40...+100
	Operation	°C	-40...+80
Degree of protection			IP 20
Miscellaneous Characteristics			
Thermal Resistance (Junction to Case)		°C/W	3.5
Weight		g (oz)	100 (3.5)
LED	Input		Green
Input Terminals			M3.5 or equivalent
Output Terminals			M4 or equivalent
Mounting Screw Torque		Nm	1.0

SECTION 4

## Heat Sink/Class 6 SSR Relay

Thermal management is a fundamental consideration in the design and use of Solid State Relays (SSRs) because of the contact dissipation (typically 1 W per amp). It is, therefore, vital that sufficient heat sinking is provided, or the life and switching reliability of the SSR will be compromised. The unique design of the Magnecraft aluminum heat sink maximizes heat dissipation. This heat sink is available for Magnecraft's panel mount SSRs and ensures reliable operation when properly selected for the specific application. For ease of installation, all mounting holes are pre-drilled and tapped.

### Optional Thermal Pad (SSR-TP-1)

See Section 3 p.21

### Optional Heat Sink (SSR-HS-1)

See Section 3 p.20

### User Guide:

The Magnecraft SSR should be firmly mounted on a clean, smooth heat sink surface using thermally conductive or suitable thermal transfer pads.

- The Magnecraft heat sink matches heat dissipation requirements for Magnecraft 6 Series SSRs; up to 50 amps.
- The Magnecraft heat sink design achieves outstanding thermal efficiency.
- The Magnecraft heat sink is pre-drilled and tapped to suit the Magnecraft SSR 6 Series "hockey puck style" range.

\* De-rating curve without fan.
