1 Introduction

The AS5170-SO_EK_SB socket board is used for quick programming of the AS5170A and AS5170B magnetic rotary position sensors without soldering due to its ZIF socket.

This board can be used in combination with the AS5xxx-EK-USB-PB UART Programming Board and the provided LabVIEW evaluation software.

2 Board description

The PCB offers direct connecting option to the AS5xxx-EK-USB-PB UART Programmmer with the 4-pin single-row connector on the left side. A ZIF Open-Top-Socket for SOIC8 packages is mounted in the middle. Pin 1 of the IC is indicated by a small white dot on the PCB.

All passive components needed for proper operation are included on bottom side the PCB.
