Plastic Push Pull Interconnects

ITT

ENGINEERED FOR LIFE

We Connect

When it matters most

For more than a century, ITT Cannon has developed innovative interconnect solutions for the world's most critical applications. With facilities in the United States, Germany, Italy, Mexico, China and Japan, each with its unique strengths, we offer our customers interconnect solutions that are truly Engineered for Life.

In addition to this truly global footprint, we offer highly specialized, segmented industry expertise. We have a proven track record as an industry leader in medical and industrial applications. This has equipped us with the knowledge needed to continue to produce the most advanced, resilient and reliable connectors for our customers' most challenging conditions.

Connecting the world's most important information with those who need it.

Drawing upon nearly 50 years of global presence in the medical industry, ITT Cannon represents a committed partner to medical equipment manufacturers, bringing connector solutions to the applications that help change lives every day.

The ITT Cannon difference

- Global capabilities & local support
- Proven application expertise
- A century of interconnect leadership
- A committed innovator & business partner

About ITT

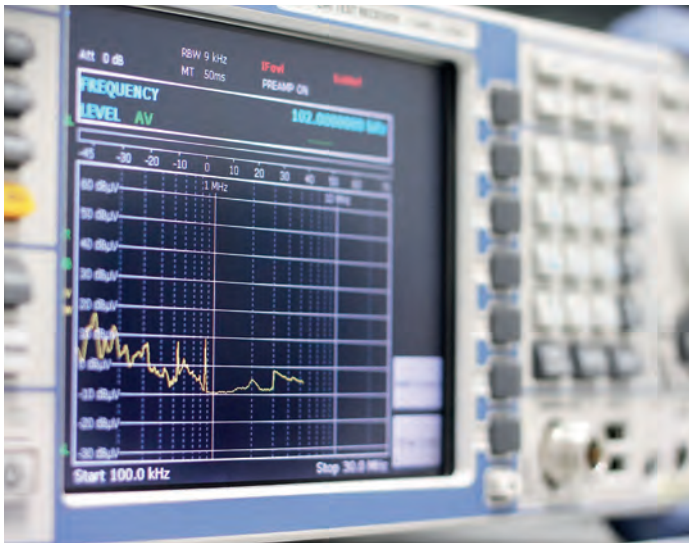
ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in a total of approximately 125 countries. For more information, visit www.itt.com.

ITT Cannon Push Pull PL Series

The ITT Cannon PL Series of plastic push pull interconnects is a high quality, versatile and cost effective solution for challenging medical and industrial applications where miniaturized, lightweight and durable connectors are critical to operating performance.

ITT Cannon's PL Series is a 'Plastic Latching' push pull connector that delivers the ultimate in performance when it matters most. Available in 2 to 14 way variants, with durability in excess of 2,000 mating cycles and with 6 keying options and 7 color codings the PL Series is an extremely versatile solution for a wide variety of both disposable and reusable applications.

Cannon's integrated cable assembly solutions combined with intermateability with existing push pull industry solutions ensures the PL Series is the ultimate choice for today's critical applications.



Key features

- Innovative self-latching mechanism enables quick and simple mating & un-mating
- Medical grade quality – lightweight and ruggedized
- 6 keying and 7 color coding options enables wide customization
- Available in 2 to 14 way variants
- Accommodates cable sizes ø 2.7 to 6.5 mm
- Fully sterilizable – by gas or steam
- Value added cable assembly solutions available
- Intermateable with existing industry solutions

Applications

- Medical
  - Electrosurgery tools
  - ECG devices
  - Catheters
  - Sensors
  - Respirators
  - Defibrillators
  - Dental tools
- Industrial electronics
- Test and measurement

ENGINEERED FOR LIFE

PL Series product overview

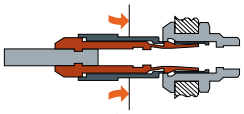
PL Series performance data

Operating temperature range	PSU: -50 to 150° C (Standard offering) PEI: -50 to 170° C (Contact ITT Cannon)
Current rating	2 to 10A
Insulation resistance	10^{12} Ω
Voltage	0.6 to 1.2 kV rws

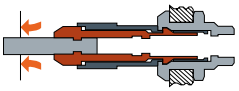
Ingress protection	IP50
Durability	In excess of 2,000 cycles
Sterilization capability	Can be sterilized by gas or steam
Certifications	UL Certified RoHS compliant

PL Series Push Pull latching system.

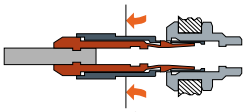
1. The push-pull locking system is widely used for quick and easy mating and un-mating.



2. To mate the connectors simply push the plug into the socket.



3. Once the connectors are mated, they cannot be un-mated by pulling on parts other than the release sleeve of the outer shell.



4. To un-mate the connectors, simply pull the release sleeve of the outer shell.

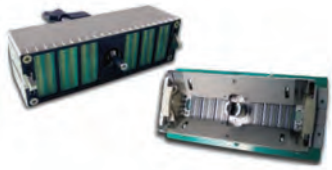
Additional advanced, resilient and reliable solutions from ITT Cannon

DL

The DL Series of Zero Insertion Force (ZIF) connectors are high performance, multiple-wire power and signal connectors with a minimum rated life of 10,000 mating cycles.

QLC

The miniaturized QLC series is a durable, highly reliable and easily assembled high pin count connector solution for today's portable medical and industrial applications.



DLP

The DLP series of connectors provide extremely reliable performance with minimized signal paths and crosstalk as the innovative design ensures receptacle contacts mate directly to the PCB.

Universal Contact

The UC series has a singular contact design which exhibits over 0.3N of force with only 0.1mm of deflection and provides the ultimate dry circuit pressure contact for commercial and handheld applications.

APD

APD is a full-plastic, proven bayonet series with IP69K sealing and color and mechanical coding that is an ideal solution for critical environments that require high sealing grades.

Customized Cable Assemblies

ITT Cannon has value added cable assembly capabilities at its global engineering centers and the proven expertise to partner with customers to develop specialized assemblies for any application.
