# LDT481 Series 480W DIN Rail Switching Power Supply

LDT481 Series is a high power switching mode power supplies with three phase input voltage 400 – 500 VAC, delivering 480 W of output power, covering output voltages from 24 to 72 V (model dependent).

Their compact size, high efficiency and excellent reliability together with easy installation make them fit demanding applications where compactness and high power are needed.

LDT481 Series are suitable for SELV and PELV circuitry (up to 48 VDC models) and are designed to be mounted on DIN rail and installed inside a protective enclosure.

#### **Key Features & Benefits**

- 3 phase AC input 400 500 VAC
- Overload 150%
- High Efficiency and compact size
- Constant current or hiccup mode limitation, user settable
- User settable current limitation (Hiccup or Constant mode)
- Easy parallelable for power increase
- Natural convection cooling
- 72 V output model as standard

#### **Applications**

- Automation
- Process Control
- Communication
- Instrumentation Equipment

# **1. MODEL SELECTION**

| MODEL     | INPUT VOLTAGE                 | # of PHASES | OUTPUT VOLTAGE | OUTPUT CURRENT |
|-----------|-------------------------------|-------------|----------------|----------------|
| LDT481-12 | 400 - 500 VAC / 520 - 725 VDC | 3           | 12 VDC         | 40 A           |
| LDT481-24 | 400 - 500 VAC / 520 - 725 VDC | 3           | 24 VDC         | 20 A           |
| LDT481-48 | 400 - 500 VAC / 520 - 725 VDC | 3           | 48 VDC         | 10 A           |
| LDT481-72 | 400 - 500 VAC / 520 - 725 VDC | 3           | 72 VDC         | 6.7 A          |

# 2. INPUT SPECIFICATIONS

Technical parameters are typical, measured in laboratory environment at 25°C and 400 VAC / 50 Hz, at nominal values, after minimum 5 minutes of operation.

| PARAMETER   | DESCRIPTION / CONDITION                        | SPECIFICATION                                     |
|---|--|---|
| Input AC Voltage Range <sup>1</sup>   | Rated, three phase (UL certified)<br>Operating | 400 – 500 VAC<br>340 – 550 VAC                    |
| Input DC Voltage Range  |  | 520 – 725 VDC                                     |
| Input Frequency   |  | 47 - 63 Hz  |
| Input AC Current  | Vin = 400 VA0                                  | C 1.3 A   |
| Input AC Current  | Vin = 500 VA0                                  | C 1.1 A   |
|   | Vin = 520 VA0                                  | C 1.2 A   |
| Input DC Current  | Vin = 725 VA0                                  | C 0.9 A   |
| Inrush Peak Current   |  | ≤ 50 A  |
| Touch (Leakage) Current   |  | ≤ 0.15 mA   |
| Internal Protection Fuse  | None, external fuse must be provided           |   |
| Recommended External Protection It is strongly recommended to provide external surge arresters (SPD) according to local regulations |  | <sup>e</sup> Fuse 3x 10 AT or 3x MCB 10 A C curve |
| <b>4</b>  |  |   |

 $^{\rm 1}$  In case of 2-phase operation, reduce the output load to 50% of the nominal value.

<sup>2</sup> Ripple and Noise are measured with 20 MHz bandwidth, probe terminated with a 0.1µF MKP parallel capacitor.

<sup>3</sup> Pay attention, set the current limitation mode jumper on C.C. mode when connecting more units in parallel.

NOTE: Power rating, losses, efficiency, ripple, thermal behavior and start-up may change outside of the nominal rated input range. Contact factory for details.
