SQS CONNECTOR

Features

● Mating

Intelligent CPA adopted. It enables the connector to be locked securely and prevents incomplete mating on the assembly line resulting in improved connector retention force.

Terminal construction

Squib connectors

It is designed to prevent the deformation of the contact part when processing wire harness by protecting the contact part of each terminal with a box.

Scooping (kojiri) preventive construction

Using a shunt ring with a countermeasure for scooping (kojiri), the resistance to scooping (kojiri) insertion and withdrawal is improved.

●Noise suppression

Ferrite core provides simple and reliable noise suppression characteristics.

●Two types of CPA housing

1A type: Normal type

2A type: CPA housing has the jig tool insertion part in a tail part in order to easily connector disassembly operation with a jig tool such as drivers.

- * They are selectable by usage and installed place of connector.
- * Contact JST for details.

This connector for air-bag has intelligent CPA, which allows locking the connector, incomplete mating detection and release of short-circuit at the same time.

- * Compliant with ELV/RoHS.
- * Contact JST for details.
