

RFID System V680 Series

CSM_V680 Series_DS_E_1_1

RFID Systems with ISO/IEC 18000-3 (ISO/IEC15693) Compliance

- High-speed communications and highly reliable communications provided with an electromagnetic induction system and unique technology.
- Antennas and RF Tags with excellent environmental resistance.
- Wide line-up of ultra-compact, long-life RF Tags, with capacities from 1 to 32 kbytes.
- Visualizes the communications status for simple analysis of the operating environment.
- Complies with FCC Standards and R&TTE Directive.

System Configuration

Connect V680 Antennas and Amplifier Units to a V680-series Controller, and read or write data from or to RF Tags.

* For information on the combinations that can be used, refer to *Combinations of Amplifier Units, Antennas, and RF Tags* on pages 2 to 3.

Handheld Type

Note: Certification for radio wave regulations has been acquired for Japan, Europe, the USA, Canada, Mexico, Singapore, Malaysia, the Philippines, China, Taiwan, and Korea, for easy application overseas.
 Contact your OMRON sales representative for details on whether application is supported in other countries.
 The latest information on the status of certification for radio wave regulations in various countries can be confirmed on the OMRON website.

* For information on the combinations that can be used, refer to *Combinations of Amplifier Units, Antennas, and RF Tags* on pages 2 to 3.

Note: For details, refer to the relevant user's manual (Z248, Z249, Z262, Z271, Z272, Z278, and Z279).

* When using the V680-D1KP52MT or V680-D2KF52M embedded in metal, use the V680-HS51/-HS52 Antenna.

Communications will not be possible if the V680-HS63 Antenna is used.

Communications will not be possible if the V680-HS65 Antenna is used with the V680-D1KP52MT, V680-D1KP53M, or V680-D2KF52M.

Transmission is also possible with RF Tags other than those of the V680 Series as long as they comply with ISO/IEC 18000-3 (ISO/IEC 15693). However, transmission with RF Tags other than those of the V680 Series cannot be assured. The user must confirm transmission capabilities carefully prior to use.

*1. Refer to the User's Manual (Cat. No. Z262) for data retention time for temperatures of 85°C or higher. If the V680 has been stored at 125°C or higher, write the data again even if the data does not need to be changed.

*2. 150°C heat resistance: The heat resistance has been checked at 150°C for up to 1,000 hours, and thermal shock has been checked through testing 1,000 thermal cycles each of 30 minutes at -10/150°C. (Test samples: 22, defects: 0)

*3. 180°C heat resistance: The heat resistance has been checked at 180°C for up to 200 hours, and thermal shock has been checked through testing 200 thermal cycles each of 30 minutes at -10°C/180°C. (Test samples: 22, defects: 0)

*4. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM1030 standard.

Write endurance		100,000 times per block (at 25°C)
Ambient operating temperature (during transmission)		-10 to 85°C (with no icing)
Ambient storage temperature (during data backup)		-40 to 110°C (with no icing) Heat resistance: 2,000 thermal cycles each of 30 minutes at room temperature/200°C (Refer to Heat Resistance, below, for details.)
Ambient operating humidity		No limits.
Degree of protection		IEC 60529, IP67
Vibration resistance		10 to 2,000 Hz, 1.5-mm double amplitude at 150 m/s ² acceleration with 10 sweeps in X, Y, and Z directions for 15 minutes each
Shock resistance		500 m/s ² in X, Y, and Z directions 3 times each (18 times in total)
Materials		PPS resin
Weight		Approx. 90 g

* The data retention time at high temperatures (110 to 200°C) is 10 hours. Rewrite the data before 10 hours has lapsed.

Heat Resistance

Sufficient heat resistance has been confirmed by evaluation testing comprising 2,000 thermal cycles each of 30 minutes at room temperature/200°C. The lifetime of the V680-D1KP58HT is affected by high-temperature storage, due to the effects of high temperatures on internal components. For details on the relationship between heat resistance and lifetime, refer to the User's Manual (Cat. No. Z262).

Ambient storage temperature		-25 to 65°C (with no icing)	
Ambient operating humidity		25% to 85% (with no condensation)	
Insulation resistance		20 MΩ min. (at 500 VDC) applied as follows: (1) Between power supply terminals and grounded case (2) Between ground and terminals	
Dielectric strength		1,000 VAC (50/60 Hz) for 1 minute (1) Between power supply terminals and grounded case (2) Between ground and terminals	
Degree of protection		Panel mounted (equivalent to IP20)	
Vibration resistance		10 to 150 Hz variable vibration, 0.2-mm double amplitude at 15 m/s ² acceleration, with 10 sweeps in X, Y, and Z directions for 8 minutes each	
Shock resistance		150 m/s ²	
Appearance		105 × 90 × 65 mm (not including projections)	
Material		Polycarbonate (PC) resin, ABS resin	
Weight		Approx. 300 g	
Connectable Amplifier Units		1	2

Note: For details, refer to the User's Manual (Cat. No. Z249).

USB Port

The USB port is used for a simple connection with a personal computer using a USB cable. The port complies with USB 1.1, and the USB cable uses a series A or series mini-B connector. A USB port driver must be separately provided. Consult with your OMRON representative for details. When connected to a host device via USB, the communications will use 1:1 protocol regardless of the setting of DIP switches 3 to 9. The USB port is not used for control purposes. When building a system, be sure to provide an RS-232C port or RS-422/RS-485C port.

Amplifier-integrated Controller (DeviceNet ID Slave/PROFIBUS ID Slave)

Item	Model	V680-HAM42-DRT	V680-HAM42-PRT
Network compatibility		DeviceNet	PROFIBUS DP-V0
Connectable Antennas		One channel (V680-HS□□)	
Rated voltage		24 VDC (−15% to 10%) including 10% ripple (p-p)	
Power consumption		4 W max. (Current consumption of 200 mA max. at power supply voltage of 24 VDC)	
Ambient operating temperature		−10 to 55°C (with no icing)	
Ambient storage temperature		−25 to 65°C (with no icing)	
Ambient operating humidity		25% to 85% (with no condensation; ambient operating temperature is 40°C max. at humidity of 85%)	
Insulation resistance		20 MΩ min. (at 500 VDC) between all terminals excluding the ground terminal and the case	
Dielectric strength		1,000 VAC (50/60 Hz) for 1 minute between all terminals excluding the ground terminal and the case	
Vibration resistance		10 to 150 Hz, 0.2-mm double amplitude at 15 m/s ² acceleration with 10 sweeps in X, Y and Z directions for 8 minutes each	
Shock resistance		150 m/s ² in X, Y, and Z directions 3 times each (18 times in total)	
Appearance		65 × 65 × 65 mm (excluding protrusions)	
Degree of protection		IEC 60529, IP20	
Materials		Polycarbonate (PC) resin, ABS resin	
Weight		Approx. 150 g	
Mounting		DIN Track	

Note: 1. For details, refer to the *User's Manual* (Cat. No. Z278).

2. The number of words allocated in the master depends on the Access Mode.

Amplifier-integrated Controllers (ID Flag Sensors)

Input specifications		Transistor output Short-circuit current: 3 mA (typical) (for short-circuit between IN terminal and 0 V), OFF voltage: 15 to 30 VDC, ON voltage: 0 to 5 VDC, Input impedance: 8.2 kΩ, Applied voltage: 30 VDC max.	
Output specifications		NPN open-collector output 30 VDC, 20 mA max., Residual voltage: 2 V max.	PNP open-collector output 30 VDC, 20 mA max., Residual voltage: 2 V max.
Ambient operating temperature		−10 to 55°C (with no icing)	
Ambient storage temperature		−25 to 65°C (with no icing)	
Ambient operating humidity		25% to 85% (with no condensation; ambient operating temperature is 40°C max. at humidity of 85%)	
Insulation resistance		20 MΩ min. (at 500 VDC) between all terminals excluding the FG terminal and the case	
Dielectric strength		1,000 VAC (50/60 Hz) applied for 1 minute between all terminals excluding the FG terminal and the case	
Vibration resistance		10 to 150 Hz, 0.2-mm double amplitude at 15 m/s ² acceleration with 10 sweeps in X, Y and Z directions for 8 minutes each	
Shock resistance		150 m/s ² in X, Y, and Z directions 3 times each (18 times in total)	
Appearance		90 × 30 × 65 mm (excluding protrusions)	
Degree of protection		IEC 60529, IP40	
Materials		Polycarbonate (PC) resin, ABS resin	
Weight		Approx. 130 g	
Mounting		DIN Track	

Note: 1. For details, refer to the *User's Manual* (Cat. No. Z279).

2. The connectors are not water resistant. If there is a possibility that water will be splashed onto the ID Sensor Unit, mount it inside of a control box. Also, be sure to use the V680 as a set with the V680-A60 Interface Cable (sold separately).

$$\text{RF Tag travel speed (conveyor speed)} = \frac{\text{Travel distance (D) in communications area}}{\text{Communications time (T)}}$$

Calculation Example

Read Processing Using Combination of V680-D1KP66T and V680-HS63

$$\text{RF Tag travel speed (m/min)} = \frac{50(\text{mm})}{43(\text{ms})} \div 60 \div 1000 \approx 69(\text{m/min})$$

- Note:**
1. The travel speed depends on factors such as the communications distance Y and axial deviation. Therefore, it is recommended to refer to the communications area figure and to perform operation using the widest part of the area.
 2. The calculated value is a rough guide.
Perform testing with the actual devices before actual operation.
 3. This calculation formula does not include communications error processing.

TAT When Using an ID Controller (Reference Values)

TAT (Turn Around Time)

TAT refers to the total time required from the point at which a host device (such as a personal computer) starts sending a command until a response is received.

$$\text{TAT} = \text{Command send time} + \text{RF Tag transmission time} + \text{response}$$

Command send time: This is the time required for sending a command from the host device to the Controller.

It varies depending on the communications speed and format.

RF Tag transmission time: This is the time required for transmission between the Antenna and the RF Tag.

Response receipt time: This is the time required for returning a response from the Controller to the host device.

It varies depending on the communications speed and format.

Safety Precautions

WARNING

Do not use this product as a detection device to protect people.

* This catalog is intended only to help select the appropriate product. Be sure to read the User's Manual for usage precautions prior to using the product.

Precautions for Safe Use

To ensure safety, be sure to follow the following precautions:

1. Do not operate this product in any flammable, explosive, or corrosive gas environment.
2. Do not disassemble, repair, or remodel this product.
3. Tighten the base lock screws and terminal block screws completely.
4. Be sure to use wiring crimp terminals of the specified size.
5. If any cable has a locking mechanism, be sure to check that it has been locked before using it.
6. The DC power supply must be within the specified rating (24 VDC +10%/–15%).
7. Do not reverse the power supply connection.
8. Do not insert water, wire, etc., into any of the gaps in the case. Doing so may cause fire or electric shock.
9. Turn OFF the Controller or ID Sensor Unit power before attaching or removing the Antenna.
10. If multiple Antennas are mounted near each other, communications performance may decrease due to mutual interference. Refer to the manual for the Antennas and RF Tags and check to make sure there is no mutual interference before installation.
11. To remove the ID Controller, catch a tool on the mounting hook and gently remove the Unit.
12. Wire correctly and do not short-circuit the load. The ID Controller may rupture or burn.
13. Do not use in environments that are subject to oil.
14. Never use an AC power supply.
15. In the event that the product exhibits any abnormal condition, immediately stop using the system, turn OFF the power, and contact your OMRON sales representative.
16. Dispose of this product as industrial waste.
17. Be sure to follow any other warnings, cautions, and notices given in this document.

Precautions for Correct Use

Please observe the following precautions to prevent failure to operate, malfunctions, or undesirable effects on product performance.

Installation Site

Install the product at a location where:

- It is not exposed to corrosive gases, dust, metal chips, or salt.
- The ambient operating temperature is within the range stipulated in the specifications.
- There are no sudden variations in temperature (no condensation).
- The ambient operating humidity is within the range stipulated in the specifications.
- No vibration or shock exceeding the values stipulated in the specifications is transmitted directly to the body of the product.
- It is not subject to splashing water, oil, or chemical substances.

Installation

- The product uses the 13.56-MHz frequency band to communicate with RF Tags. Some devices, such as some motors, inverters, and switching power supplies, generate electromagnetic waves (i.e., noise) that can affect communications with RF Tags. If any of these devices are nearby, communications with RF Tags may be affected or RF Tags may be destroyed. If the product is to be used near such devices, check the effects on communications before using the product.
- To minimize the general influence of noise, observe the following precautions:
 1. Ground any metallic material located around this device to 100Ω or less.
 2. Keep the product away from high voltage and heavy current.
- Do not pull on the cable.
- Do not use products that are not waterproof in misty environments.
- Do not subject the products to chemicals that adversely affect product materials.
- When installing the product, tighten screws to the following torque:

Controller:	1.2 N·m max
ID Sensor Unit:	0.4 N·m
V680-HS51 Antenna:	6 N·m
V680-HS52 Antenna:	40 N·m
V680-HS63 Antenna:	1.2 N·m
V680-HS65 Antenna:	1.2 N·m

V680-D1KP54T:	0.3 to 0.5 N·m
V680-D2KF67/-D2KF67M:	0.6 N·m
V680-D8KF67/-D8KF67M:	0.6 N·m
V680-D8KF68/-D32KF68:	1.2 N·m

Communications with Host (V680-HAM91/-HAM81)

The I/O status may be unstable when the ID Controller is started.

After turning ON the power supply to the ID Controller, allow at least 1 second to elapse before performing control.

Storage

Store the product at a location where:

- It is not exposed to corrosive gases, dust, metal chips, or salt.
- The ambient storage temperature is within the range stipulated in the specifications.
- There are no sudden variations in temperature (no condensation).
- The ambient storage humidity is within the range stipulated in the specifications.
- No vibration or shock exceeding the values stipulated in the specifications is transmitted directly to the body of the product.
- It is not subject to splashing water, oil, or chemical substances.

Cleaning

Do not use thinner, benzene, acetone, or kerosene for cleaning.

Using these substances may dissolve the resin material and the case.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

2012.2

In the interest of product improvement, specifications are subject to change without notice.
