

## AC-DC Adapter

## ADT-60W Series / ADT-060A□A□ B-A

## ADT-060A

## Highlights &amp; Features

- Up to 89% efficiency
- Meet ErP Lot 7 & DoE VI
- No load power consumption < 0.15W
- Over-Voltage/Load/Temperature & Short Circuit protections

## Safety Standards

CB Certified for worldwide use

## Model Number:

ADT-060A□A□ B-A

## Unit Weight:

180±10 grams (6.35±0.35 ounces)

## Dimensions (W x L x H):

46.0 x 108.0 x 29.5 mm  
(1.81 x 4.25 x 1.16 inch)

## General Description

The ADT-060A adapter comes with universal AC input at 85Vac to 264Vac. With the efficiency up to 89% and the extremely low no-load power consumption below 0.15W, the ADT-060A is compliant with DoE level VI and ErP Lot 7 efficiency standard for energy savings. The supreme feature allows the adapter to save the energy when it is either under the operating mode or under the standby mode.

## Model Information

| Model Number     | Input Voltage Range | Rated Output Voltage | Rated Output Current |
|------------------|---------------------|----------------------|----------------------|
| ADT-060A12A□ B-A | 85-264Vac           | 12Vdc                | 5.0A                 |
| ADT-060A15A□ B-A |                     | 15Vdc                | 4.0A                 |

> 40°C de-rate power by 2.5% / °C

# AC-DC Adapter

## ADT-60W Series / ADT-060A□A□ B-A

### Output Load De-rating VS Input Voltage

**Fig. 3 De-rating for Low Input Voltage (All Models)**  
 $< 90\text{Vac}$  de-rate power by  $2\% / \text{Vac}$

### Others

#### Delta RoHS Compliant

#### Restriction of the usage of hazardous substances

The European directive 2011/65/EU limits the maximum impurity level of homogeneous materials such as lead, mercury, cadmium, chrome, polybrominated flame retardants PBB and PBDE for the use in electrical and electronic equipment. RoHS is the abbreviation for "Restriction of the use of certain hazardous substances in electrical and electronic equipment".

This product conforms to this standard.

#### PFC – Norm EN 61000-3-2

#### Line Current Harmonic content

Typically, the input current waveform is not sinusoidal due to the periodical peak charging of the input capacitor. In industrial environment, complying with EN 61000-3-2 is only necessary under special conditions. Complying to this standard can have some technical drawbacks, such as lower efficiency as well as some commercial aspects such as higher purchasing costs. Frequently, the user does not profit from fulfilling this standard, therefore, it is important to know whether it is mandatory to meet this standard for a specific application.

### Attention

Delta provides all information in the datasheets on an "AS IS" basis and does not offer any kind of warranty through the information for using the product. In the event of any discrepancy between the information in the catalog and datasheets, the datasheets shall prevail (please refer to [www.DeltaPSU.com](http://www.DeltaPSU.com) for the latest datasheets information). Delta shall have no liability of indemnification for any claim or action arising from any error for the provided information in the datasheets.
