

Brief Description

The ZSPM1063 is a configurable true-digital single-phase PWM controller for high-current, non-isolated DC/DC supplies. It operates as a synchronous step-down converter in a single-rail and single-phase configuration.

The ZSPM1063 integrates a digital control loop, optimized for maximum flexibility and stability, as well as load step and steady-state performance. In addition, a rich set of protection and monitoring functions is provided. On-chip, non-volatile memory (NVM) and an I²C interface facilitate configuration.

The PC-based IDT Pink Power Designer™ graphical user interface (GUI) provides a user-friendly and easy-to-use interface to the device for communication and configuration. It can guide the user through the design of the digital compensator and offers intuitive configuration methods for additional features, including protection and sequencing.

Benefits

- Fast configurability and design flexibility
- Simplified design and integration
- Reduced component count through system level integration
- Simplified monitoring for system power and thermal management
- Higher energy efficiency across all output loading conditions

Physical Characteristics

- Operation temperature: -40°C to +125°C
- Operation from a single 5V or 3.3V supply
- V_{OUT} max: 5V
- Lead-free (RoHS compliant) 32-pin QFN package (5mm x 5mm)

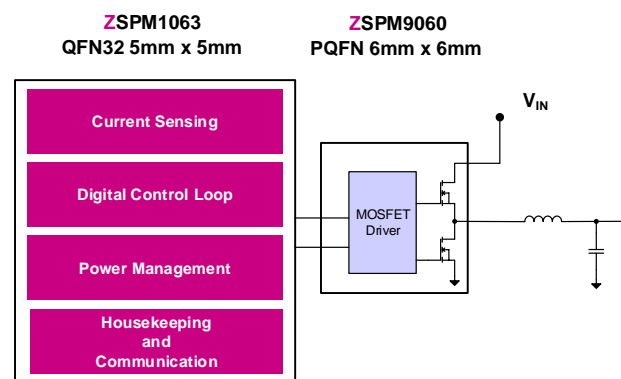

Available Support

- Evaluation Kit
- PC-based Pink Power Designer™ GUI

Features

- Programmable digital control loop
- Optional PMBus™ address selection without external resistors
- V_{IN} feed-forward
- Advanced, digital control techniques
 - Tru-sample Technology™
 - State-Law Control™ (SLC)
 - Sub-cycle Response™ (SCR)
- Improved transient response and noise immunity
- Discontinuous conduction mode (DCM) at light loads
- Protection features
 - Over-current protection
 - Over-voltage protection (V_{IN}, V_{OUT})
 - Under-voltage protection (V_{IN}, V_{OUT})
 - Overloaded startup
 - Restart and delay
- Fuse-based NVM for improved reliability
- Re-programmable one-time programmable (OTP) memory feature
- V_{OUT} sequencing from external source
- Pin-strapping options: RTUNE and RVSET
- Tri-state PWM output
- Additional driver support options
- Constant on-time controller (COT) in DCM

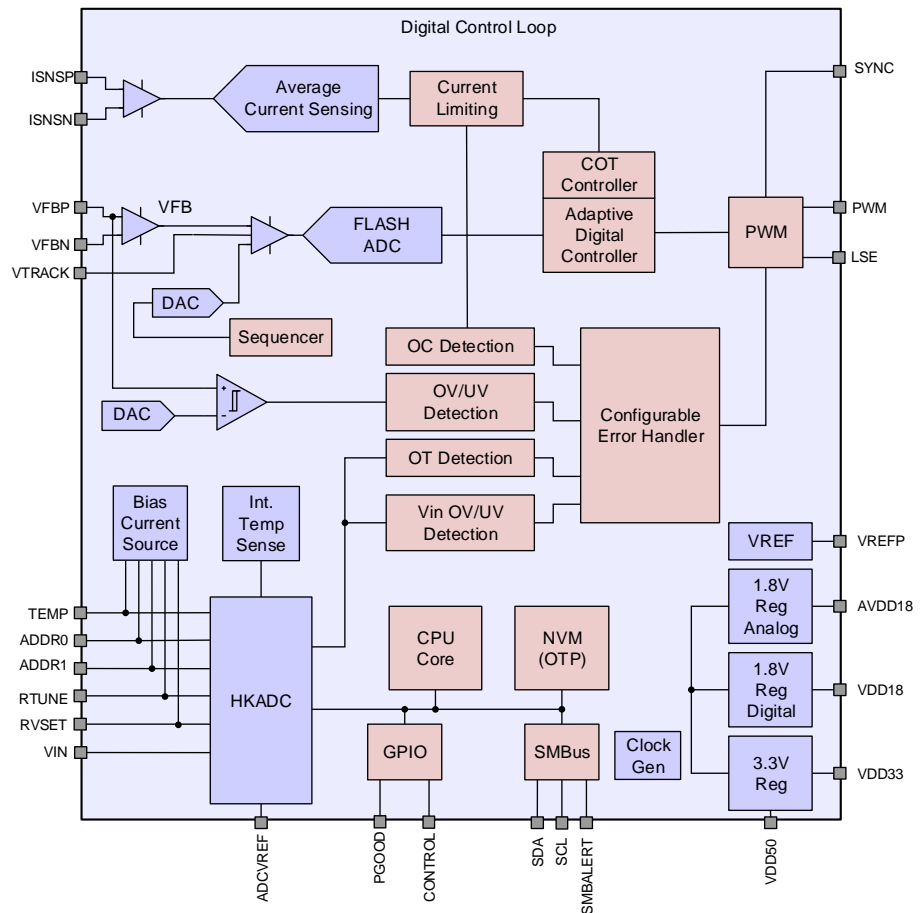

ZSPM1063 Typical Application Diagram

ZSPM1063 Block Diagram

Typical Applications

- ❖ Telecom Switches
- ❖ Servers and Storage
- ❖ Base Stations
- ❖ Network Routers
- ❖ Industrial Applications
- ❖ Single-Rail/Single-Phase Supplies for Processors, ASICs, FPGAs, DSPs

Ordering Information

Sales Code	Description	Package
ZSPM1063BA1R 1	ZSPM1063 Lead-free QFN32 — Temperature range: -40°C to +125°C	Reel
ZSPM1063-KIT02	Evaluation Kit with PMBus™ Communication Interface. The Pink Power Designer™ GUI is available for download on www.IDT.com/ZSPM1063 after login (see details in data sheet section 7).
