

High Frequency Wire Wound Transformers

EP13 Platforms - SMT

- Power Range:** up to 60W
- Height:** 12.7mm Max
- Footprint:** 17.7mm x 14.0mm Max
- Topology:** Forward and Flyback

High Frequency Wire Wound Transformers

EP13 Platforms - SMT

NOTES:

1. The temperature of the component (ambient plus temperature rise) must be within the stated operating temperature range.
2. The above transformers and inductors have been tested and approved by Pulse's power IC partners and are sited in the appropriate datasheet or evaluation board documentation at these companies. To determine which IC and IC partners are matched with the above Pulse part numbers please consult the IC Cross Reference on the Pulse website.
3. For flyback topology applications, it is necessary to ensure that the transformer will not saturate in the application. The peak flux density (Bpk) should remain below 2700Gauss.

To calculate the peak density, use the following formula

$$B_{pk} \text{ (Gauss)} = K1_Factor * I_{pk} \text{ (A)}$$

4. In high volt-sec applications, it is important to calculate the core loss of the transformer.

Approximate transformer core loss can be calculated as:

$$CoreLoss \text{ (W)} = 2.5E-14 * (Freq_kHz)^{1.65} * (\Delta B_Gauss)^{2.63}$$

where ΔB can be calculated as:

For Flyback Topology: $\Delta B = K1_Factor * \Delta I(A)$

For Forward Topology: $\Delta B = K1_Factor * Volt\text{-}\mu\text{sec}$

5. The standard pin-numbering for this package is indicated in the below mechanical drawing showing pin 1 on the lower right corner and the numbers proceeding clock wise to pin 10 on the upper right corner. However, for those parts that are indicated as having an alternate pinout, pin 1 is in the lower left corner and the numbers proceed counter-clockwise to pin 10 in the upper left corner. Refer to the alternate mechanical drawing for further details.
6. Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number (i.e. PA1136NL becomes PA1136NLT). Pulse complies with industry standard tape and reel specification EIA481. The tape and reel for this product has a width (W=32mm), pitch (Po=24mm) an depth (Ko=13.2mm).
7. The "NL" suffix indicates an RoHS-compliant part number. Non-NL suffixed parts are not necessarily RoHS compliant, but are electrically and mechanically equivalent to NL versions. If a part number does not have the "NL" suffix, but an RoHS compliant version is required, please contact Pulse for availability.
