

# UP5

## High power, drum inductors

### Description

- 18.54 x 15.24 x 7.11mm maximum surface mount package
- Ferrite core material
- Inductance range from 1.0 $\mu$ H to 1000 $\mu$ H
- Current range from 0.56 to 20 Amps
- Frequency range up to 1MHz
- RoHS compliant

### Applications

- Buck or boost inductor
- Desktop computer
- Workstations/servers
- DVD Players
- Portable power devices
- Base stations
- Industrial power supplies
- Output filter chokes
- Test equipment instrumentation

### Environmental Data

- Storage temperature range: -40°C to +125°C
- Operating temperature range: -40°C to +125°C (ambient plus self-temperature rise)
- Solder reflow temperature: J-STD-020D compliant

- OpenCircuitInductance(OCL)TestParameters:100kHz,0.25Vrms,0.0Aac
- I<sub>rms</sub>: DC current for an approximate  $\Delta T$  rise of 40°C without core loss. Derating is necessary for AC currents. PCB layout, trace thickness and width, air-flow and proximity of other heat generating components will affect the temperature rise. It is recommended the part temperature not exceed 125°C under worst case operating conditions verified in the end application.
- I<sub>sat</sub>: Peak current for approximately 10% rolloff at 25°C.
- K-factor: Used to determine Bp-p for core loss (see graph).  $Bp-p = K \cdot L \cdot \Delta I$ , Bp-p (Gauss), K: (K-factor from table), L: (inductance in  $\mu\text{H}$ ),  $\Delta I$  (peak-to-peak ripple current in amps).
- Part Number Definition: UP5-xxx-R
  - UP5 = Product code and size
  - xxx = Inductance value in  $\mu\text{H}$ , R = decimal point. If no R is present, then third digit equals the number of zeros.
  - “-R” suffix = RoHS compliant

Dimensions (mm)

xxx = Inductance value in  $\mu\text{H}$  (R = Decimal point).  
 If no "R" is present, then the third digit equals the number of zeros.  
 wwlllyy = Date code R = Revision level

**Packaging information**

Supplied in tape-and-reel packaging, 250 parts per reel, 13" diameter reel.
