* I.D: (a) As received; (b) After unrestricted recovery.

MATERIALS

1. CRIMP SPLICE: Base Metal: Copper Alloy 102 per ASTM B-75.
   Plating: Nickel per QQ-N-290.
   Color Code: Two color-coded stripes, see table.
2. SEALING SLEEVE: Heat-shrinkable, transparent clear, polytetrafluoroethylene (PTFE).
3. MELTABLE LINER: Fluorinated ethylene propylene. Color: clear.

APPLICATION

1. These devices provide an immersion resistant one-to-one in-line crimp splice in wires rated for at least 200°C. Multiple wire assemblies are also possible within the size range shown in the table above. Immersion resistance of multiple wire assemblies requires mechanical deformation of sealing sleeve during installation.
2. These devices are rated at 260°C maximum.
3. For installation procedure, see RPIP-685-00.
4. Parts will meet all performance requirements of EN 3373-001 and EN 3373-013 when installed according to installation procedure specified above.
