DMC714A WIRING SYSTEM SERVICE KIT
For MIL-STD-1760 Electrical Interconnection Systems

DMC714A for MIL-STD-1760 Electrical Interconnection Systems

Actual Kit may vary from example shown.

The DMC714A electrical connector maintenance kit contains the crimp tools, turret head, positioners, gages, and insertion/removal tools necessary to service the MIL-STD-1760 Electrical Interconnection Systems.

The DMC714A kit also supplies your staff with the information to select and use the tools necessary to repair the covered connectors.

It is not a cost effective use of the time of your technical staff to start from scratch and try to become intimately knowledgeable about which precision tools must be used to repair each electrical connector, contact and terminal. So DMC has cross referenced these tools to the connector series covered and the contacts they use for you. This information is contained in an easy to read tool selection chart.

In addition, the DMC714A kit contains illustrated operating instructions for all the tooling included.

DMC714A CONNECTOR COVERAGE

MANUFACTURER	SERIES
MIL-PRF-38999	III

TOOL KIT CONFIGURATION

Type of Case	Portable
Number of Cases	1
Color	Black
Type of Construction	Polypropylene copolymer
Application	MIL-STD-1760 Electrical Interconnection Systems
Coverage	Airframe Power Connectors
	Terminals size 12 AWG and Smaller
	Coaxial Connectors
Type of Inserts	Unicellular Polyethylene Foam with Die Cut Tool Cavities
