

## S5KC Modular Series On-Line Uninterruptible Power Systems (UPS)

The SolahD S5KC Modular On-Line UPS Series is scalable from 5 to 20 kVA, offering many flexible options by adding a few standard modules. Designed to be fully configured, tested and shipped in the configuration you need, the S5KC Modular UPS also has the ability to be easily upgraded in the field to either higher VA ratings (up to 20 kVA maximum), longer back-ups time or to add N+x parallel redundancy. Configurations can be cost-effectively upgraded keeping your S5KC Modular UPS current without a large reinvestment in a new system.

The optional N+x redundancy provides a fault-tolerant group of power modules and controls. The modular design is easy to upgrade so the UPS can grow with the needs of the system that is being protected.

Each of the modular components, including 5 kVA power modules, LCD display, battery modules and system control modules, can be hot-swapped making it easy to increase power, extend your back-up time or add redundancy while still providing power protection to the load.

This fault-tolerant system uses intelligent power and battery modules which take themselves off-line if there is a problem without interrupting power to the load. Self-diagnostic capabilities simplify maintenance and troubleshooting. Each unit incorporates an internal automatic bypass.

### Applications

With multiple standard options in a smaller footprint, providing more flexibility for capacity and communication both pre- and post-installation, the S5KC delivers the power protection needs in applications such as

- Oil and Gas (Pure OEMs)
- Pharmaceutical
- Automotive
- Food & Beverage

### Features

- Module level redundancy provides multiple layers of protection to ensure your machine has the power it needs to run safely with no single point of failure, critical loads continue to run on conditioned battery power even if a system component malfunctions.
- An industry leading 0.9 power factor keeps machines performing flawlessly when running on battery power.
- Superior overload capabilities deliver conditioned power during temporary power anomalies without unnecessarily transferring to and from bypass power.

- Independently controlled maintenance bypass is designed to provide maximum system availability to critical equipment by allowing transfer of connected equipment to an alternate power path. The UPS can then be turned Off and removed from service with no interruption of power to connected equipment.
- True on-line double conversion with a large input voltage range (low line transfer down to 110 Vac) isolates sensitive equipment from power fluctuations while minimizing transfers to increase battery life.
- ENERGY STAR® qualified UPS models – UPS products meeting the EPA's requirements use an average of 35% less energy than their standard counterparts.
- To enhance the availability and trouble-free operation, every pre-configured S5KC UPS arrives standard with one IS-UNITY-DP communications card installed. This enables you to take advantage of the remote monitoring and diagnostic service available with your system during your initial standard warranty period.
- Start-up services available, contact your local sales representative for details.

### Certifications and Compliances

#### All Models

- Energy Star models: S5KC-A, S5KC-B, S5KC-C (except 5 kVA), S5KC-D (except 5 kVA), S5KC-E, S5KC-F:

- Listed, UPS Equipment
  - UL 1778, Fourth Edition
  - CSA C22.2 No. 107.3
- ABS Type Approved
- RoHS Compliant

#### Series S5KCA, S5KCB, S5KCC, S5KCD

- (Low Voltage and EMC Directive)
  - EN62040-1, EN62040-2
- EAC: TR CU 004/2011 - Technical Regulation of Custom Union "On the safety of low-voltage equipment"

## Chassis Selection

The SolaHD S5KC Modular UPS system has multiple chassis available to build on:

Select the proper chassis based on your applications current and future need for expansion. Also consider if redundancy will be required for your application then consider your application power and location wiring needs. To help with selecting the appropriate chassis series, we have provided a useful selection flow chart to guide you to an appropriate chassis series to meet your requirements.

## Steps to Selection

1. Determine the maximum kVA you will need for future expansion.
2. Determine the kVA and run time value for your immediate need.
3. Using the flow chart to the right, determine the voltage, phase configuration and chassis requirements.
4. Determine if you need redundancy. If the exact run time is critical and you are not sure which unit is appropriate, please contact our technical support team to aid in selection.
5. Select the unit that meets both your immediate requirements, and is expandable to your future needs. Each chassis will have a "Maximum Upgrade" capacity. The Maximum Upgrade is the highest kVA expansion that particular configuration is capable of without removing any of the battery modules from the original configuration.
6. External Battery Cabinets (EBC). Depending on extended run-times desired or your location's spacing requirements, you may be able to add an optional EBC to extend your run-time.
7. Optional External Maintenance Bypass (EMB) or other available accessories. Review your application's current and future needs and consider all functional options including filters and spare modules if desired.

## Which Product Do I Select?

S5KC-F SERIES	970 (38)	850 (34)

Chassis Designation	Number of Bays	Description
S5KC-A	10 Bay	5-15 kVA, 1PH, Xfmr-free, 200-240 Vac input/output
S5KC-B	16 Bay	5-20 kVA, 1PH, Xfmr-free, 200-240 Vac input/output
S5KC-C	12 Bay	5-15 kVA, 1PH, Xfmr-based, 200-240 Vac input - 200/100-240/120 Vac output
S5KC-D	16 Bay	5-20 kVA, 1PH, Xfmr-based, 200-240 Vac input - 200/100-240/120 Vac output
S5KC-E	10 Bay	5-15 kVA, 2PH, Xfmr-free, 200/100-240/120 Vac input/output
S5KC-F	16 Bay	5-20 kVA, 2PH, Xfmr-free, 200/100-240/120 Vac input/output

## S5KC Operating Modes

The S5KC UPS is a true online double-conversion system, having the following operating modes:

- Normal Mode
- Back-up Mode
- Auto Restart Mode
- Bypass Mode

### Normal Mode

The power module rectifiers derive power from a utility AC source and supply regulated DC power to the inverter. The module's inverter regenerates precise AC power to supply the connected equipment. The battery charger is in the power module and maintains a float-charge on the batteries of the UPS; additionally, the optional charger module (S5KCCHRGMOD) can also charge the batteries to maintain a quicker recharge time for long back-up time applications.

### Back-up Mode

When AC utility fails, the connected equipment is supplied power by the inverter, which obtains energy from the battery modules. The output power will not be interrupted during the failure or restoration of the AC utility/mains source.

### Auto Restart Mode

After a power outage and complete battery discharge, and once AC utility is restored, the UPS will automatically restart and resume supplying power to connected equipment. This feature is enabled at the factory, but can be disabled by the user. The user can also program two auto restart delay settings from the LCD:

- Battery capacity level (%)
- Countdown timer

### Bypass Mode

The bypass provides an alternate path for power to the connected equipment and operates in the following manner:

- **Automatic:** In the event of an internal fault or should the inverter overload capacity be exceeded, the UPS performs an automatic transfer of the connected equipment from the inverter to the bypass source.
- **Manual:** Should the UPS need to be taken out of service for limited maintenance or repair, manual activation of the bypass will cause an immediate transfer of the equipment from the inverter to the bypass source.

S5KC-A & S5KC-B Frames:

					C6 = 6 Strings, CSB UPS 12460 F2 FR
					C7 = 7 Strings, CSB UPS 12460 F2 FR

**Example:** 10 Bay, 1PH, 10 kVA/9 kW, No Charger Module, Non-Redundant, 2 strings, 208V, 60 Hz, L-L-G, No Distribution Slots, Standard Product

S5K	A	10 A	A	N	C2
-----	---	------	---	---	----

### Configuration Notes:

1. Every pre-configured S5KC UPS arrives standard with one IS-UNITY-DP communications card installed. This allows you to take advantage of the monitoring included with your system during your initial standard warranty period. Start-up services available, contact your local sales representative for details.
2. "Maximum Upgrade" capacity considerations. The Maximum Upgrade is the highest kVA expansion each configuration will provide without removing any of the battery modules from the original configuration. Please consider your future expansion and redundancy needs.

Output Voltage/Frequency/Wiring	Distribution Slot 1	Distribution Slot 2	Product Type
A = 200 V, 60Hz, L-L-G	N = None	N = None	C = Standard product

**Configuration Notes:**

1. Voltage Options: Additional Output Voltage Configurations are available. Refer to Table 16 and 18, part number configuration template table.  
Example: D = 240 V, 60Hz, L-L-G ; S5KC05ANN1D<sup>GN</sup>NC is a 240 V configuration.
2. Every pre-configured S5KC UPS arrives standard with one IS-UNITY-DP communications card installed. This allows you to take advantage of the monitoring included with your system during your initial standard warranty period. Start-up services available, contact your local sales representative for details.
3. Available Expansion Bays (Total/Power) equals the TOTAL available expansion bays still available and POWER is the number of bays that can be used for remaining POWER modules up to the maximum allowed for that configuration. For example: S5KA05ANNC1C<sup>GN</sup>NC, has 7 total, 2 power so you can add either 6 battery modules, 1 charging module or 6 battery modules and 2 power modules.
4. Do you require an EBC or MBC? Please refer to configuration table 20 and 21 to build an appropriate part.

① Configurations with run-times in excess of 5 minutes are available, contact Technical Services.

**Table 19: External Battery Cabinet (EBC) Part Number Configuration**

The SolaHD S5KC Modular UPS includes internal batteries. Optional, matching external battery cabinets, offer extended battery runtime. Use the part number template below to identify the description of any given part number.

## Optional Equipment

Catalog Number	Description
<b>Communication Options</b>	
<b>IS-UNITY-DP</b>	IS Communications Card for multiple protocols: BACnet, Modbus, SNMP, Web, YDN23
<b>IS-RELAY</b>	Relay contact board, relay contact signals for "On Battery", "Low Battery", "On Bypass", "On UPS", "Summary Alarm" and "UPS Fault".
<b>S5KREPOKIT</b>	Remote Emergency Power Off Kit includes 50' length of cable with connector to UPS and external push button switch.

## Optional Equipment

Model Number	Description
<b>S5KCRACKKIT</b>	Rackmount Kit
<b>S5KCEBCCBL1M</b>	EBC Cable 1 meter
<b>S5KCEBCCBL3M</b>	EBC Cable 3 meters
<b>S5KCEBCCBL5M</b>	EBC Cable 5 meters
<b>S5KCLRTCONNKIT</b>	LRT Connector Kit
<b>S5KCLRTTEMPKIT</b>	LRT Temperature Sensor Kit
<b>S5KCHRGRMOD</b>	Charger Module, 10 amps
<b>S5KCEBCCARD</b>	EBC Communication Card
<b>S5KCBATMODCU</b>	Expansion Battery to increase run time. Note: Each kit includes one string (2 modules)

## Spare Equipment Parts

Model Number	Description
<b>S5K5KPWRMOD1</b>	Power Module (PM1), 208/120 Vac, 5 kVA / 4.5kW (E & F Chassis)
<b>S5K5KPWRMOD2</b>	Power Module (PM2), 230, 208 Vac, 5 kVA / 4.5kW (A, B, C & D Chassis)
<b>S5KCBATMODCU</b>	Replacement Battery Note: Each kit includes one string (2 modules)
<b>S5KCBYDPSMOD</b>	Bypass DSP Module
<b>S5KCBYPMCUMOD</b>	Bypass MCU Module
<b>S5KCLCDMOD</b>	LCD module
<b>S5KCAFLTRKIT</b>	Air Filter Kit
<b>S5KCAFLTRKIT-FD</b>	Fine Dust Air Filter Kit
<b>S5KCEZELHMI</b>	Metal HMI Bezel with Display Opening and Filter
<b>S5KCEZEL</b>	Metal Bezel for Module Bays and Filter

## S5KCHRGRMOD, Charger Module

In AC mains mode, the charger module charges the system battery modules or external battery cabinet. Each charger module is rated to deliver 10 A charging current. The charger module has an independent control function and maintains real-time communication with the system and the battery modules to ensure stable charging and fault protection.

The charger module may be added or replaced on-line with no interruption or danger to the user, connected battery system or connected equipment.

**Example:** 10-Bay Configuration  
(S5KC Chassis E and F)

<b>S5K5KPWRMOD1</b>	(P, B, C) *
(P, B, C) *	(P, B, C) *
<b>S5KCBATMODCU = 2 Modules or 1 string</b>	
B **	B **
B **	B **

P = Power module

B = Battery module

C = Charger module

\* Where you have an empty spot you can add a power, battery or charger.

\*\* Battery module only.

3EWPS4K06KPAD	3-year extended warranty for S4K4UC PADS
3EWPS4K10KPAD	3-year extended warranty for S4K6UC PADS

S4KC Industrial – UPS Models

The extended warranty program extends the standard two-year product warranty by the term of the extension purchased, 1-year or 3 years. This results in warranty terms of 3 or 5 years (depending on the extension selected) from the date of purchase. We will repair or replace the SolaHD unit at any point during the extension period, subject to the same conditions as the standard warranty. The warranty extension is not transferable.

Catalog Number	Description
<b>1–Year Extended Warranty</b>

## Field Service Programs for the S5KC Series

These programs are for Domestic coverage (valid only within the continental United States and Canada); additional travel expenses may be billed to customers with site locations more than 150 miles from a major metropolitan area.

### S5KC Modular Start-Up Programs

Start-up services should be ordered as a separate line item at the time of purchase. S5KC Series UPS sold with start-up Services are provided with a 2 year parts and labor warranty. Please refer to the following information for a menu of start-up options and please choose the appropriate start-up service required. If start-up is not ordered and performed, please note that this will reduce your warranty period to two years of parts and, 90 days labor.

A separate Preventative Maintenance Only plan is available in addition to the standard Start-Up plan.

### Service Programs - S5KC Series

**Preferred service level options** include 6-hour on-site response, 24x7 within 150 miles of nearest service centers. 24x7 emergency service includes parts (including internal batteries), labor, and travel. Also includes one (1) Preventive Maintenance (PM) visit per year, scheduled at the customer's convenience (24x7).

**Essential service level options** include 6-hour on-site response, 24x7 within 150 miles of nearest service centers. 24x7 emergency service includes parts (including internal batteries), labor, and travel. Also includes one (1) Preventive Maintenance (PM) visit per year, scheduled by the customer for M-F 8AM-5PM.

**Basic service level options** include 6-hour on-site response, 24x7 within 150 miles of nearest service centers. 24x7 emergency service includes parts (excluding internal batteries), labor, and travel. Preventive Maintenance (PM) not included and is not available if the Basic Service plan is selected.

**Field Service Programs for the S5KC Series**

Catalog Number	Equipment
<b>SUS5KCXXMF</b>	S5KC Start-Up Monday-Friday 8-5
<b>SUS5KCXX24</b>	S5KC Start-Up 7x24
<b>SUPS5KCXXMF</b>	S5KC Start-Up Plus M-F 8-5 w/1PM over initial warranty period
<b>SUPS5KCXX24</b>	S5KC Start-Up Plus 7x24 w/1PM over initial warranty period

PM = Preventative Maintenance

**S5KC Modular Service Programs**

Contact Technical Services to obtain the catalog number for any of the Preferred, Essential or Basic Services (catalog number depends on the S5KC configuration).
