

Description

The APX809S/810S are used for microprocessor (μ P) supervisory circuits to monitor the power supplies in μ P and digital systems. They provide excellent circuit reliability and low cost by eliminating external components and adjustments when used with +5V, +3.3V, +3.0V and +2.5V powered circuits.

These circuits perform a single function: they assert a reset signal whenever the V_{CC} supply voltage declines below a preset threshold, keeping it asserted for at least 240ms after V_{CC} has risen above the reset threshold. Reset thresholds suitable for operation with a variety of supply voltages are available. The APX809S/810S have push pull outputs. The APX809S has an active low $\overline{\text{RESET}}$ output, while the APX810S has an active high RESET output. The reset comparator is designed to ignore fast transients on V_{CC} , and the outputs are guaranteed to be in the correct logic state for V_{CC} down to 1V. Low supply current makes the APX809S/810S ideal for use in portable equipment. The APX809S/810S is available in a 3-pin SOT23 package.

Features

- Precision Monitoring of +2.5V, +3V, +3.3V and +5V Power-Supply Voltages
- Fully Specified Over-temperature
- Available in Three Output Configurations
- Push-Pull $\overline{\text{RESET}}$ Active Low (APX809S)
- Push-Pull RESET Active High (APX810S)
- 200ms Typ Power-On Reset Pulse Width
- 7 μ A Supply Current (Typ.)
- Guaranteed Reset Valid to $V_{CC} = +1V$
- No External Components
- SOT23 Available in "Green" Molding Compound (No Br, Sb)
- **Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)**
- **Halogen and Antimony Free. "Green" Device (Note 3)**

- Notes:
1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS), 2011/65/EU (RoHS 2) & 2015/863/EU (RoHS 3) compliant.
 2. See <https://www.diodes.com/quality/lead-free/> for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
 3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

Pin Assignments

Applications

- Computers
- Controllers
- Intelligent Instruments
- Critical μ P and μ C Power Monitoring
- Portable/Battery Powered Equipment

Typical Applications Circuit

Pin Descriptions

| Pin Number | | Pin Name | Function |
|------------|------------|-------------|-------------------------|
| SOT23 (SA) | SOT23 (SR) | | |
| 3 | 3 | VCC | Operating Voltage Input |
| 2 | 1 | RESET/RESET | Reset Output Pin |
| 1 | 2 | GND | Ground |

Absolute Maximum Ratings (@T_A = +25°C, unless otherwise specified.) (Note 4)

| Symbol | Parameter | Rating | Unit |
|--------------------|--|--------------|------|
| V _{CC} | Supply Voltage | -0.3 to 6.0 | V |
| V _{RESET} | RESET/RESET Voltage | -0.3 to 6.0 | V |
| I _{CC} | Input Current | 20 | mA |
| I _O | Output Current | 20 | mA |
| θ _{JA} | Thermal Resistance Junction-to-Ambient | SOT23 232 | °C/W |
| θ _{JC} | Thermal Resistance Junction-to-Case | SOT23 87 | |
| ESD | HBM (Human Body Model) | 6,000 | V |
| | MM (Machine Model) | 600 | |
| T _J | Junction Temperature Range | -40 to +150 | °C |
| T _{STG} | Storage Temperature Range | -65 to +150 | °C |

Note: 4. Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

Recommended Operating Conditions (@T_A = +25°C, unless otherwise specified.)

| Symbol | Parameter | Min | Max | Unit |
|--------------------|-------------------------------------|-----|------|------|
| T _A | Operating Ambient Temperature Range | -40 | +125 | °C |
| V _{CC} | Supply Voltage | 1.0 | 5.5 | V |
| V _{RESET} | RESET /RESET Output Voltage | 0 | 5.5 | V |

Electrical Characteristics (@ $T_A = +25^\circ\text{C}$, unless otherwise specified.)

| Symbol | Parameter | Test Conditions | Min | Typ | Max | Unit |

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
