

## U5700

### Submersible Liquid Level Pressure Transducer

#### SPECIFICATIONS

- High Accuracy
- CE Compliant and Waterproof
- UL Certified
- Variety of Pressure Port Configurations
- Waterproof
- Optional Stainless Steel Snubber
- IP68 Rated Connection and Submersible Polyurethane Jacketed Cable
- Gage, Sealed, Absolute, Compound
- Expedite Configurations Available (10 Days)

The U5700 submersible pressure transducers from the UltraStable line of MEAS, with their modular design, include an IP68 rated connection and submersible polyurethane jacketed cable along with a variety of pressure port options. This latest series features high accuracy and a quick turnaround for demanding commercial and heavy industrial applications, as well as liquid level applications. This series is suitable for measurement of liquid or gas pressure, even for difficult media such as contaminated water, steam, and mildly corrosive fluids.

The transducer's durability is excellent with no O-rings or organics exposed to the pressure media. The transducer can be fully submerged since the wetted materials for the back end consist of FKM Fluoroelastomers, 316 stainless steel and polyurethane. A POM protective cap port option is also available for liquid level applications. The U5700 is weatherproof and exceeds the latest heavy industrial CE requirements including surge protection. The circuit is protected from reverse wiring at input and short circuit at output.

This product is geared to the OEM customer for low to mid volumes. MEAS stands ready to provide a custom design of the U5700 where the volume and application warrants. Additional configurations not listed are either available or possible. Please inquire for further information.

## FEATURES

- Heavy Industrial CE Approval
- 10 V/m EMI Protection
- Reverse Polarity Protection on Input
- Short Circuit Protection on Output
- Up to  $\pm 0.1\%$  Accuracy
- Up to  $\pm 0.75\%$  Total Error Band
- Compact Outline
- IP68 Waterproof Grade
- Custom Cable Lengths
- POM Protective Cap for Liquid Level Applications

## APPLICATIONS

- Tank Pressure and Level
- Cryogenic Tanks
- Pump and Compressor Controls
- Marine and Water Systems
- Agricultural Sprayers (Water, Fertilizer, Pesticide)
- Fire Suppression Systems
- Liquid Level Applications
- Refrigeration Systems (Chillers)
- Tractors (Hydraulic)
- Outdoor Pressure Applications

Shock	50g, 11msec Half Sine Shock per MIL-STD-202G, Method 213B, Condition A				
Vibration	±20g, MIL-STD-810C, Procedure 514.2, Fig 514.2-2, Curve L				

For custom configurations, consult factory.

**Notes**

Compensated Temperature: The temperature range over which the product will produce an output proportional to pressure within the specified performance limits.

Usage Temperature: The temperature range over which the product will maintain the IP68 rating.

Storage Temperature: The temperature range over which the product can be stored safely in occasions without pressure applied or power input and remains rated performance. Beyond this temperature range may cause permanent damage to the product.

All configurations are built with voltage reverse and output short-circuit protections.

**CE Compliance**

EN 55022 Emissions Class A & B

IEC 61000-4-2 Electrostatic Discharge Immunity (8kV contact/15kV air)

IEC 61000-4-3 Radiated, Radio-Frequency Electromagnetic Field Immunity (10V/m, 80M-1GHz)

IEC 61000-4-4 Electrical Fast Transient Immunity (1kV)

IEC 61000-4-5 Surge Immunity (V+ to V-: ±2KV/42Ω; L to Case: ±1KV/12Ω; V- to V<sub>0</sub>: ±1KV/42Ω)

IEC 61000-4-6 Immunity to Conducted Disturbances Induced by Radio Frequency

Fields (150K~80MHz, 10V level for voltage output models, 3V level for current output model)

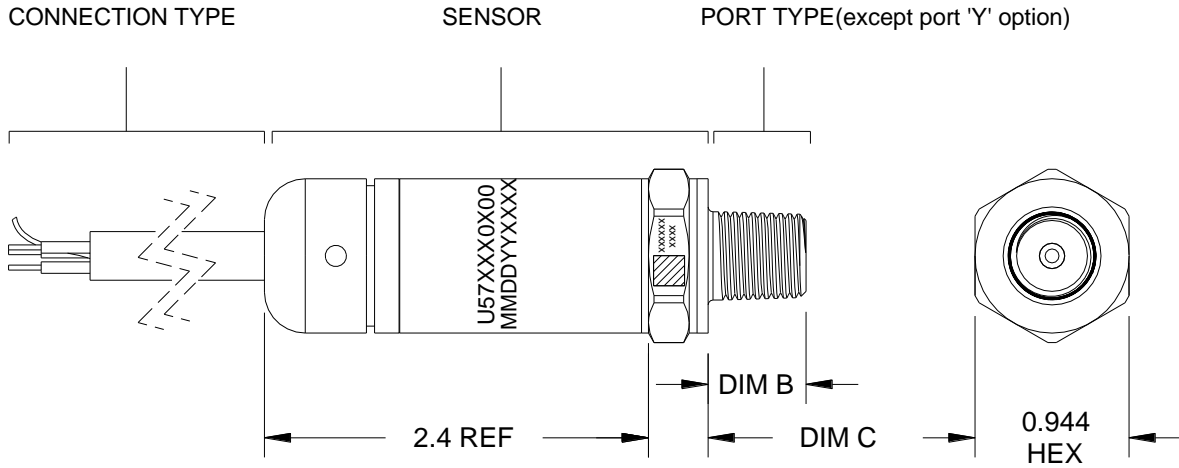

IEC 61000-4-9 Pulse Magnetic Field Immunity (100A/m peak)

For all CE compliance tests, max allowed output deviation ±1.5 %F.S.

Submersible Liquid Level Pressure Transducer

## WIRING

**CABLE WITH GLAND SEAL  
4 WIRE, 22AWG, SHIELD, VENT TUBE  
SUBMERSIBLE POLYURETHANE JACKETED CABLE**

Connection (Current Output)					
CONNECTION	+SUPPLY	-SUPPLY	GROUND	P REF VENT	
CABLE	RED	BLK	DRAIN WIRE	IN CABLE	

Connection (Voltage Output)					
CONNECTION	+SUPPLY	+OUTPUT	COMMON	GROUND	P REF VENT
CABLE	RED	WHT	BLK	DRAIN WIRE	IN CABLE

### Notes:

1. The drain wire is internally terminated to pressure port.
2. A psiG transducer requires a vent to atmosphere on the pressure reference. This is accomplished via a vent tube in the cable. The end of the cable should be terminated to a clean dry area.
3. The IP68 rating is only met when the cable termination is to a dry clean area. Moisture can enter the transducer through the vent tube at the cable termination.

## OUTPUTS
