

Fiber Optic Transmitter

OPF694-2

Features:

- Low Cost 850 nm LED Technology
- High Thermal Stability
- High optical coupling efficiency to multimode fiber
- Metal ST* style receptacle
- Industrial temperature range

Description:

The OPF694-2 fiber optic transmitter is a high performance device packaged for data communication links. This transmitter is an 850 nm GaAlAs LED and is specifically designed to efficiently launch optical power into either 50/125µm or 62.5/125µm diameter multimode fiber. Two power ranges with upper and lower limits are offered which allows the designer to select a device best suited for the application.

Applications:

- Industrial Ethernet equipment
- Copper-to-fiber to media conversion
- Intra-system fiber optic links

Typical Coupled Power $I_F = 100\text{mA}$, 25°C
