

BMZ SERIES BATTERY POST MOUNT ZCASE® FUSE HOLDER

275A • 32V DC • 2-way or 3-way • ZCASE®

Description

The BMZ battery post mount fuse holder allows you to mount fusing directly to a post style battery terminal. The BMZ series accepts the Littelfuse proprietary ZCASE fuse that is available in 80-600A ratings with similar characteristics to the MEGA® fuse. The BMZ post mount fuse holder mounts directly to the battery without any need for additional mounting hardware and is available in 2 or 3-pole versions (see image above). The insulated bolt on the busbar eliminates the traditional need for nylon nuts used on legacy CF8 fuses. The ZCASE fuses can be assembled using a standard M8 flange nut. Fuse mounting nuts are included with the boxed kits but need to be sourced separately when ordering individual components.

The BMZ post mount fuse holder features a compact design which saves space and eliminates the need to wire in a separate fuse holder or power distribution module. Additional circuits are added to the battery directly on top of the ZCASE fuse with wired ring terminals. The fuse holder is available in individual component part numbers and in a complete boxed kit.

Ordering Information

| PART NUMBERS | | POSITIONS | DESCRIPTION |
|--------------|--------------|-----------|---|
| BULK | BOXED KIT | | |
| - | 0FHZ00854-BX | 2 | Kit: 882-854 (2 way bus bar), 876-199 (terminal mount), 901-325 (red cover), 1X M8 Bolt, 3x M8 Nuts |
| - | 0FHZ00853-BX | 3 | Kit: 882-853 (3 way bus bar), 876-199 (terminal mount), 901-325 (red cover), 3x M8 Nuts |
| 882-854 | - | 2 | 2 Way Bus Bar & Stud Assembly |
| 882-853 | - | 3 | 3 Way Bus Bar & Stud Assembly |
| 876-199 | - | - | Battery Terminal |
| 901-325 | - | - | Red Rubber 2 or 3 Way Cover |
| 32980001ZXM8 | - | - | ZCASE Bolt with 3 Snap Fit |

Features and Benefits

- Mounts directly to a post style of battery
- Available in 2 or 3 pole designs
- Uses ZCASE single Fuses (M8) available 40-600A
- Maximum continuous throughput 275A
- Unlike other battery mount holders the BMZ series does not require a special nut due to isolated bus bar studs and can be installed using standard M8 nuts (sold separately)
- Fusing directly at the battery allows location of larger power distribution boxes outside of the engine compartment while assuring protection of the supply cables

Specifications

| | |
|---------------------------------|-----------------------------------|
| Max Voltage Rating: | 32 V DC or max rating of the fuse |
| Max Continuous Current: | 275A |
| Available Fuse Rating: | 80-600A |
| Fuse Terminal Torque: | M8 Nut: 14 ± 2 Nm |
| Battery Terminal Torque: | 5.4 ± 0.9 Nm @ 540 RPM |
| Operating Temp: | -40° to 125° C |

Applications

- Mounts directly to a post style battery terminal
- Consolidate multiple fuse holders and reduce wiring
- High amperage starter circuit protection

SMZ Series Stud Mount ZCASE® Fuse Holder

The SMZ stud mount fuse holder allows you to mount fusing directly to a M8 or M10 on applications such as batteries, alternators, battery switches or electrical relays. The SMZ stud mount fuse holder is ideal for stacking to create a 2 pole version.
