

Evaluation board based on the STHV748S high voltage pulser

Data brief

Description

The STEVAL-IME011V2 evaluation board is designed around the STHV748S 4-channel 5-level high voltage pulser, a state-of-the-art device designed for ultrasound imaging applications.

This board facilitates evaluation of the ultrasound pulser IC thanks also a new graphical user interface.

Once configured, the output waveforms can be displayed directly on an oscilloscope by connecting the probe to the relative BNCs.

Features

- 4-channel outputs: high voltage and low voltage BNC connectors
- Up to 4 memory locations to store own waveforms designs
- USB connector to load own waveforms onto the board
- Dedicated connectors to supply high voltage and low voltage to the STHV748 output stage
- 4-key button rapid preferred program selection
- RoHS compliant
