

Fiber Connector Cleaners - Data Sheet

The Jonard Tools quick click ferrule end face cleaner is designed to provide exceptional cleaning performance by cleaning connectors beyond the critical fiber core area and cleaning deep into the contact area of a bulkhead adapter or connectors on fiber optic cables. The tethered dust cap provides protection for the micro fiber cleaning fabric and is an adapter for connector end face cleaning.

The Fiber Connector Cleaners feature a patented 360 degree Rotational Tip for extra wide cleaning, easy one push operation and extendable nozzle, providing an additional 1.5 inches for a nozzle length of 4 inches to aid in accessing deep ports or crowded access panels. Additionally the Fiber Connector Cleaners use a non-woven micro fiber that is lint free. The FCC-120 provides 500+ cleanings and both the FCC-125 and FCC-250 provide 800+. The outer bodies are made from static dissipative material for safe ESD work.

PATENTED CLEANING TECHNOLOGY

1. Slide-Guide™ non-slip micro tape feeder guarantees high reliability
2. Dual Rotational tip provides superior ferrule End face cleaning
