

USB-OTG BUS-Port ESD-Protection for $V_{BUS} = 28\text{ V}$

FEATURES

- Ultra compact LLP75-7L package
- Low package height < 0.6 mm
- 3-line USB ESD-protection with max. working range = 5.5 V
- V_{BUS} -protection with 28 V working range
- Low leakage current
- Low load capacitance $C_D = 0.7\text{ pF}$
- ESD-protection to IEC 61000-4-2
± 15 kV contact discharge
± 15 kV air discharge
- Surge current acc. IEC 61000-4-5 $I_{PP} > 3\text{ A}$
- e4 - precious metal (e.g. Ag, Au, NiPd, NiPdAu) (no Sn)
- Compliant to RoHS Directive 2002/95/EC and in accordance to WEEE 2002/96/EC

MARKING (example only)

Dot = pin 1 marking
XX = date code
YY = type code (see table below)

| ORDERING INFORMATION | | | |
|----------------------|--------------------|--|------------------------|
| DEVICE NAME | ORDERING CODE | TAPED UNITS PER REEL (8 mm TAPE on 7" REEL) | MINIMUM ORDER QUANTITY |
| VBUS053CZ-HAF | VBUS053CZ-HAF-G-08 | 3000 | 15 000 |

| PACKAGE DATA | | | | | | |
|---------------|--------------|-----------|--------|---|--------------------------------------|--------------------------|
| DEVICE NAME | PACKAGE NAME | TYPE CODE | WEIGHT | MOLDING COMPOUND FLAMMABILITY RATING | MOISTURE SENSITIVITY LEVEL | SOLDERING CONDITIONS |
| VBUS053CZ-HAF | LLP75-7L | UA | 4.2 mg | UL 94 V-0 | MSL level 1 (according J-STD-020) | 260 °C/10 s at terminals |

| ABSOLUTE MAXIMUM RATINGS | | | | |
|---|---|-----------|---------------|------|
| PARAMETER | TEST CONDITIONS | SYMBOL | VALUE | UNIT |
| Data line D+, D-, ID: Pin 1, 2 and 3 to ground (pin 7) | | | | |
| Peak pulse current | acc. IEC 61000-4-5; $t_p = 8/20\text{ }\mu\text{s}$; single shot | I_{PPM} | 3 | A |
| Peak pulse power | acc. IEC 61000-4-5; $t_p = 8/20\text{ }\mu\text{s}$; single shot | P_{PP} | 36 | W |
| ESD immunity | Contact discharge acc. IEC 61000-4-2; 10 pulses | V_{ESD} | ± 15 | kV |
| | Air discharge acc. IEC 61000-4-2; 10 pulses | | ± 15 | kV |
| V_{BUS}: Pin 6 to ground (pin 7) | | | | |
| Peak pulse current | acc. IEC 61000-4-5; $t_p = 8/20\text{ }\mu\text{s}$; single shot | I_{PPM} | 3 | A |
| Peak pulse power | acc. IEC 61000-4-5; $t_p = 8/20\text{ }\mu\text{s}$; single shot | P_{PP} | 156 | W |
| ESD immunity | Contact discharge acc. IEC 61000-4-2; 10 pulses | V_{ESD} | ± 30 | kV |
| | Air discharge acc. IEC 61000-4-2; 10 pulses | | ± 30 | kV |
| Operating temperature | Junction temperature | T_J | - 40 to + 125 | °C |
| Storage temperature | | T_{STG} | - 55 to + 150 | °C |

APPLICATION NOTE

The VBUS053CZ-HAF is intended as an ESD-protection and transient voltage suppressor for one USB-OTG port. The LLP75-7L package contains two separate dies which are mounted on a common ground plane (pin 7). The high-speed data lines D-, D+ and ID, are connected to any of the pins no. 1 to 3. As long as the signal voltage on the data lines is between the ground- and the 5 V working range, the low capacitance PN-diodes offer a very high isolation to ground and to the other data lines. But as soon as any transient signal like an ESD-signal, exceeds this working range of 5 V in either the positive or negative direction, one of the PN-diodes gets into the forward mode and clamps the transient either to ground or to the avalanche break through level. An extra avalanche diode (separate die) clamps the supply line voltage (V_{BUS} at pin 6) above the 28 V working range to ground (pin 7). Due to the “two die construction” the V_{BUS} line has a very high isolation to the data lines. In case of a destructive transient signal, i.e. coming from a charger, the data lines will not be influenced.

Remark:

The input pins no. 1, 2 and 3 are symmetrical. Each of the data signals D-, D+ and ID can be connected to pin 1, 2 or 3.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk and agree to fully indemnify and hold Vishay and its distributors harmless from and against any and all claims, liabilities, expenses and damages arising or resulting in connection with such use or sale, including attorneys fees, even if such claim alleges that Vishay or its distributor was negligent regarding the design or manufacture of the part. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
