

Digital Fiber Amplifier Unit

E3X-DA-S/MDA

CSM_E3X-DA-S_MDA_DS_E_15_4

Advanced Fiber Amplifier Units

- Features a Power Tuning function that optimizes light reception at the press of a button.
- APC circuits to suppress LED aging degradation used with 4-element LEDs.
- 2-channel models achieve the thinnest* profile in the industry, at only 5 mm per channel.
- 2-channel models also offer AND/OR control output.
- The E3X-MDA0 with two channels supports an EtherCAT Sensor Communications Unit or CompoNet Sensor Communications Unit.

* (Based on July 2012 OMRON investigation.)

Be sure to read *Safety Precautions* on page 15.

Note: Manufacture of the E3X-DA□SE-S/DA□-S/DA□AT-S/DA□IRM-S/DA□TW-S will be discontinued in March 2017.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Features

Models available for a wide variety of applications at manufacturing sites

Industry Leading Two Amplifiers Loaded in a Small Body ··· 2-channel models

Two amplifiers are loaded in a 10 mm-wide body. Space usability can be approximately doubled. In addition, approximately 40% of the energy can be saved. (compared to the value per channel of the former model)

High-speed and High-resolution Analog Output Supports Wide Variety of Applications ··· Advanced Analog Output Models

Analog Control Output

The voltage in the range of 1 to 5 V is output according to the incident level (digital display). Wide variety of applications is possible including positioning control or difference detection with multiple levels.

High-speed and High Resolution

Detection modes can be switched in accordance with applications. High-speed response of 80 μs (super-high-speed mode) supports the positioning controls that require high-speed control.

	E39-L143	1

End Plate [Refer to *PFP-□*.]

Appearance	Model	Quantity
	PFP-M	1

Ratings and Specifications

Refer to pages 17 to 20 for dimensions.

Fiber Amplifier Units

● Single-function, Standard, and Mark-detecting Amplifier Units

Item	Type	Single-function models	Standard models	Mark-detecting models (multiple color light sources)		
	Model	E3X-DA□SE-S	E3X-DA□-S	Green LED E3X-DAG□-S	Blue LED E3X-DAB□-S	Infrared LED E3X-DAH□-S
Light source (wavelength)	Red LED (635 nm)		Green LED (525 nm)		Blue LED (470 nm)	
Power supply voltage	12 to 24 VDC ±10%, ripple (p-p) 10% max.					
Power consumption	960 mW max. (current consumption: 40 mA max. at power supply voltage of 24 VDC)					
Control output	Load power supply voltage: 26.4 VDC; NPN/PNP open collector; load current: 50 mA max.; residual voltage: 1 V max.					
Remote control input	No-voltage input (contact/non-contact)		---			
Protection circuits	Reverse polarity for power supply connection, output short-circuit					
Re-sponse time	Super-high-speed mode	---		Operate: 48 μs, reset: 50 μs *1,*2		
	High-speed mode	---		Operate/reset: 250 μs		
	Standard mode	Operate or reset: 1 ms				
	High-resolution mode	---		Operate or reset: 4 ms		
Sensitivity setting	Teaching or manual method					
Func-tions	Power tuning	---		Light emission power and reception gain, digital control method		
	Timer function	---		Select from OFF-delay, ON-delay, or one-shot timer. 1 ms to 5 s (1 to 20 ms set in 1-ms increments, 20 to 200 ms set in 10-ms increments, 200 ms to 1 s set in 100-ms increments, and 1 to 5 s set in 1 s-increments)		
	Automatic power control (APC)	High-speed control method for emission current				
	Zero-reset	---		Negative values can be displayed. (Threshold value is shifted.)		
	Initial reset	Settings can be returned to defaults as required.				
	Mutual interference prevention	Possible for up to 10 Units *3				
Display	Operation indicator (orange)		Operation indicator (orange), Power Tuning indicator (orange)			
Digital display	incident level + threshold		Select from incident level + threshold or other 6 patterns			
Display orientation	---		Switching between normal/reversed display is possible.			
Ambient illumination (Receiver side)	Incandescent lamp: 10,000 lux max. Sunlight: 20,000 lux max.					
Ambient temperature range	Operating: Groups of 1 to 2 Amplifiers: -25°C to 55°C Groups of 3 to 10 Amplifiers: -25°C to 50°C Groups of 11 to 16 Amplifiers: -25°C to 45°C Storage: -30°C to 70°C (with no icing or condensation)					
Ambient humidity range	Operating and storage: 35% to 85% (with no condensation)					
Insulation resistance	20 MΩ min. (at 500 VDC)					
Dielectric strength	1,000 VAC at 50/60 Hz for 1 minute					
Vibration resistance	Destruction: 10 to 55 Hz with a 1.5-mm double amplitude for 2 hrs each in X, Y and Z directions					
Shock resistance	Destruction: 500 m/s ² , for 3 times each in X, Y and Z directions					
Degree of protection	IEC 60529 IP50 (with Protective Cover attached)					
Connection method	Pre-wired or amplifier unit connector					
Weight (packed state)	Pre-wired model: Approx. 100 g, Amplifier unit connector model: Approx. 55 g					
Materials	Case	Polybutylene terephthalate (PBT)				
	Cover	Polycarbonate (PC)				
Accessories	Instruction manual					

*1. Communications are disabled if the detection mode is selected during super-high-speed mode, and the communications functions for mutual interference prevention and the Mobile Console will not function.

*2. PNP output is as follows: Operate: 53 μs, reset: 55 μs.

*3. Mutual interference prevention can be used for only up to 6 Units if power tuning is enabled.

● Advanced and 2-channel Amplifier Units

Item	Type Model	Advanced models				2-channel models	
		External input models	Twin output models	ATC function models	Analog output models	Standard models	Model for Sensor Communications Unit *1
		E3X-DA□RM-S	E3X-DA□TW-S	E3X-DA□AT-S	E3X-DA□AN-S	E3X-MDA□ (□: 11/41/6/8)	E3X-MDA0
Light source (wavelength)	Red LED (635 nm)						
Power supply voltage	12 to 24 VDC ±10%, ripple (p-p) 10% max.						
Power consumption	1,080 mW max. (current consumption: 45 mA max. at power supply voltage of 24 VDC)						
Control output	ON/OFF output	Load power supply voltage: 26.4 VDC; NPN/PNP open collector; load current: 50 mA max.; residual voltage: 1 V max.					Supplied from the connector through the Sensor Communications Unit
	Analog output	---			Control output Voltage output: 1 to 5 VDC (Connection load 10 kΩ min.) Temperature characteristics 0.3%F.S./°C Response speed/repeat accuracy Super-high-speed mode: 80 μs/1.5%F.S. High-speed mode: 250 μs/1.5%F.S. Standard mode: 1 ms/1%F.S. High-resolution mode: 4 ms/0.75%F.S.	---	
Remote control input	No-voltage input (contact/transistor) *2	---					
Protection circuits	Reverse polarity for power supply connection, output short-circuit						
Response time	Super-high-speed mode	Operate: 48 μs, reset: 50 μs *3, *4, *5	Operate or reset: 80 μs *3			Operate or reset: 130 μs *3, *6	---
	High-speed mode	Operate or reset: 250 μs				Operate or reset: 450 μs	
	Standard mode	Operate or reset: 1 ms					
	High-resolution mode	Operate or reset: 4 ms					
Sensitivity setting	Teaching or manual method						
Functions	Power tuning	Light emission power and reception gain, digital control method					
	Differential detection	Switchable between single edge and double edge detection mode Single edge: Can be set to 250 μs, 500 μs, 1 ms, 10 ms, or 100 ms. Double edge: Can be set to 500 μs, 1 ms, 2 ms, 20 ms, or 200 ms.				---	
	Timer function	Select from OFF-delay, ON-delay, or one-shot timer. 1 ms to 5 s (1 to 20 ms set in 1-ms increments, 20 to 200 ms set in 10-ms increments, 200 ms to 1 s set in 100-ms increments, and 1 to 5 s set in 1 s-increments)					
	Automatic power control (APC)	High-speed control method for emission current					
	Zero-reset	Negative values can be displayed. (Threshold value is shifted.)					
	Initial reset	Settings can be returned to defaults as required.					
	Mutual interference prevention	Possible for up to 10 Units *7				Possible for up to 9 Units (18 channels) *8	
Counter	Switchable between up counter and down counter. Set count: 0 to 9,999,999	---					

*1. This model allows you to use an E3X-ECT EtherCAT Sensor Communications Unit or E3X-CRT CompoNet Sensor Communications Unit.

*2. Input Specifications

	Contact input (relay or switch)	Non-contact input (transistor)
NPN	ON: Shorted to 0 V (sourcing current: 1 mA max.). OFF: Open or shorted to Vcc.	ON: 1.5 V max. (sourcing current: 1 mA max.). OFF: Vcc - 1.5 V to Vcc (leakage current: 0.1 mA max.)
PNP	ON: Shorted to Vcc (sinking current: 3 mA max.). OFF: Open or shorted to 0 V.	ON: Vcc - 1.5 V to Vcc (sinking current: 3 mA max.). OFF: 1.5 V max. (leakage current: 0.1 mA max.)

*3. Communications are disabled if the detection mode is selected during super-high-speed mode, and the communications functions for mutual interference prevention and the Mobile Console will not function.

*4. PNP output is as follows: Operate: 53 μs, reset: 55 μs.

*5. When counter is enabled: 80 μs for operate and reset respectively.

*6. When differential output is selected for the output setting, the second channel output is 200 μs for operation and reset respectively.

*7. Mutual interference prevention can be used for only up to 6 Units if power tuning is enabled.

*8. Mutual interference prevention can be used for up to 5 Units (10 channels) if power tuning is enabled.

Item		Type Model	Advanced models				2-channel models	
			External input models	Twin-output models	ATC function models	Analog output models	Standard models	Model for Sensor Communications Unit
			E3X-DA□RM-S	E3X-DA□TW-S	E3X-DA□AT-S	E3X-DA□AN-S	E3X-MDA□ (□: 11/41/6/8)	E3X-MDA0
Functions	I/O setting	External input setting (Select from teaching, power tuning, zero reset, light OFF, or counter reset.)	Output setting (Select from channel 2 output, area output, or self-diagnosis.)	Output setting (Select from channel 2 output, area output, self-diagnosis output, or ATC error output)	Analog output setting (offset voltage adjustable)	Output setting (Select from channel 2 output, AND, OR, leading edge sync, falling edge sync, or differential output)		
Display		Operation indicator (orange), Power Tuning indicator (orange)	Operation indicator for channel 1 (orange), Operation indicator for channel 2 (orange)		Operation indicator (orange), Power Tuning indicator (orange)	Operation indicator for channel 1 (orange), Operation indicator for channel 2 (orange)		
Digital display		Select from incident level + threshold or other 7 patterns	Select from incident level + threshold or other 6 patterns			Select from incident level for channel 1 + incident level for channel 2 or other 7 patterns		
Display orientation		Switching between normal/reversed display is possible.						
Ambient illumination (Receiver side)		Incandescent lamp: 10,000 lux max. Sunlight: 20,000 lux max.						
Ambient temperature range		Operating: Groups of 1 to 2 Amplifiers: -25°C to 55°C Groups of 3 to 10 Amplifiers: -25°C to 50°C Groups of 11 to 16 Amplifiers: -25°C to 45°C *9 Storage: -30°C to 70°C (with no icing or condensation)						
Ambient humidity range		Operating and storage: 35% to 85% (with no condensation)						
Insulation resistance		20 MΩ min. (at 500 VDC)						
Dielectric strength		1,000 VAC at 50/60 Hz for 1 minute						
Vibration resistance (Destruction)		10 to 55 Hz with a 1.5-mm double amplitude for 2 hrs each in X, Y and Z directions				10 to 150 Hz with a 0.7-mm double amplitude for 80 min each in X, Y, and Z directions		
Shock resistance (Destruction)		500 m/s ² , for 3 times each in X, Y and Z directions				200 m/s ² for 3 times each in X, Y, and Z directions		
Degree of protection		IEC 60529 IP50 (with Protective Cover attached)						
Connection method		Pre-wired or amplifier unit connector				Connector for Sensor Communications Unit		
Weight (packed state)		Pre-wired model: Approx. 100 g, Amplifier unit connector model: Approx. 55 g				Approx. 55 g		
Materials	Case	Polybutylene terephthalate (PBT)						
	Cover	Polycarbonate (PC)						
Accessories		Instruction manual						

*9. The following temperature ranges apply for operation when an E3X-ECT or E3X-CRT Sensor Communications Unit is used with the E3X-MDA0: Groups of 1 or 2 Amplifier Units: 0 to 55°C, Groups of 3 to 10 Amplifier Units: 0 to 50°C, Groups of 11 to 16 Amplifier Units: 0 to 45°C, Groups of 17 to 30 Amplifier Units (with the E3X-ECT): 0 to 40°C.

Amplifier Unit Connectors

Item	Model	E3X-CN11/21/22	E3X-CN12
Rated current		2.5 A	
Rated voltage		50 V	
Contact resistance		20 mΩ max. (20 mVDC max., 100 mA max.) (The figure is for connection to the Fiber Amplifier Unit and the adjacent Connector. It does not include the conductor resistance of the cable.)	
No. of insertions		Destruction: 50 times (The figure for the number of insertions is for connection to the Fiber Amplifier Unit and the adjacent Connector.)	
Materials	Housing	Polybutylene terephthalate (PBT)	
	Contacts	Phosphor bronze/gold-plated nickel	
Weight (packed state)		Approx. 55 g	Approx. 25 g

Mobile Console

Item	Model	E3X-MC11-SV2
Applicable Fiber Amplifier Units		E3X-DA-S E3X-MDA E3C-LDA E2C-EDA
Power supply voltage		Charged with AC adapter
Connection method		Connected via adapter
Weight (packed state)		Approx. 580 g (Console only: 120 g)

Refer to *Instruction Manual* provided with the Mobile Console for details.

Safety Precautions

Refer to *Warranty and Limitations of Liability*.

WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

Fiber Amplifier Unit

● Designing

Operation after Turning Power ON

The Sensor is ready to detect 200 ms after the power supply is turned ON. If the Sensor and load are connected to separate power supplies, be sure to turn ON the Sensor first.

● Mounting

Connecting and Disconnecting Wire-saving Connectors

Mounting Connectors

1. Insert the Master or Slave Connector into the Amplifier Unit until it clicks into place.

2. Attach the protector seals (provided as accessories) to the sides of master and slave connectors that are not connected.

Note: Attach the seals to the sides with grooves.

Removing Connectors

1. Slide the slave Amplifier Unit(s) for which the Connector is to be removed away from the rest of the group.
2. After the Amplifier Unit(s) has been separated, press down on the lever on the Connector and remove it. (Do not attempt to remove Connectors without separating them from other Amplifier Units first.)

Adding and Removing Fiber Amplifier Units

Adding Fiber Amplifier Units

1. Mount the Amplifier Units one at a time onto the DIN track.

2. Slide the Amplifier Units together, line up the clips, and press the Amplifier Units together until they click into place.

Removing Fiber Amplifier Units

Slide Amplifier Units away from each other, and remove from the DIN track one at a time. (Do not attempt to remove Amplifier Units from the DIN track without separating them first.)

- Note: 1. The specifications for ambient temperature will vary according to the number of Amplifier Units used together. For details, refer to *Ratings and Specifications*.
2. Always turn OFF the power supply before joining or separating Amplifier Units.

Mounting the End Plate (PFP-M)

An End Plate should be used if there is a possibility of the Amplifier Unit moving, e.g., due to vibration. If a Mobile Console is going to be mounted, connect the End Plate in the direction shown in the following diagram.

Mounting the Mobile Console Head

Leave a gap of at least 20 mm between the nearest Amplifier Unit and the Mobile Console head.

Fiber Unit Connection

The E3X Amplifier Unit has a lock button for easy connection of the Fiber Unit. Connect or disconnect the fiber units using the following procedures:

1. Connection

Open the protective cover, insert the fiber units according to the fiber unit insertion marks on the side of the Amplifier Unit, and lower the lock lever.

Note: If one of the fibers from the Fiber Unit is labeled as the Emitter fiber, such as with a Coaxial Sensor, insert that fiber into the Emitter section. Refer to *Dimensions for the Fiber Unit* to see if there is an Emitter fiber label.

Fiber Units with E39-F9 Attachment

Fiber Units That Cannot Be Free-Cut (with Sleeves)

2. Disconnecting Fiber Units

Remove the protective cover and raise the lock lever to pull out the fiber units.

Note: 1. To maintain the fiber unit properties, confirm that the lock is released before removing the fiber units.
2. Be sure to lock or unlock the lock button within an ambient temperature range between -10°C and 40°C .

● Adjusting

Mutual Interference Protection Function

There may be some instability in the digital display values due to light from other sensors. If this occurs, decrease the sensitivity (i.e., decrease the power or increase the threshold) to perform stable detection.

EEPROM Writing Error

If the data is not written to the EEPROM correctly due to a power failure or static-electric noise, initialize the settings with the keys on the Amplifier Unit. ERR/EEP will flash on the display when a writing error has occurred.

Optical Communications

Several Amplifier Units can be slid together and used in groups. Do not, however, slide the Amplifier Units or attempt to remove any of the Amplifier Units during operation.

● Others

Protective Cover

Always keep the protective cover in place when using the Amplifier Unit.

Mobile Console

Use the E3X-MC11-SV2 Mobile Console for the E3X-DA-S-series Amplifier Units.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
