Features

- Low supply current: 5 μ A typ. per comparator
- Wide single supply range 2.7 V to 16 V or dual supplies (± 1.35 V to ± 8 V)
- Extremely low input bias current: 1 pA typ.
- Input common-mode voltage range includes ground
- Push-pull output
- High input impedance: 10^{12} Ω typ
- Fast response time: 2.7 μ s typ. for 5 mV overdrive
- ESD tolerance: 4 kV HBM, 200 V MM

Applications

- Automotive
- Industrial

Description

The [TSX3702](#) is a micropower CMOS dual voltage comparator which exhibits a very low current consumption of 5 μ A typical per comparator. This device was designed as the improvement of the TS3702: it shows a lower current consumption, a better input offset voltage, and an enhanced ESD tolerance. The [TSX3702](#) is fully specified over a wide temperature range and is proposed in automotive grade for the SO8 package. It is fully compatible with the TS3702 CMOS comparator and is available with similar packages. New tiny packages (MiniSO8 and DFN8 2x2 mm) are also proposed for the [TSX3702](#) thus allowing even more integration on applications.

Figure 1. Pin connections top view

2 Absolute maximum ratings

Table 1. Absolute maximum ratings (AMR)

Symbol	Parameter	Value	Unit	
V_{CC}^+	Supply voltage ⁽¹⁾	18	V	
V_{id}	Differential input voltage ⁽²⁾	±18		
V_{in}	Input voltage	-0.3 to 18		
V_o	Output voltage	18		
I_o	Output current	20	mA	
I_F	Forward current in ESD protection diodes on inputs ⁽³⁾	50		
T_j	Maximum junction temperature	150	°C	
R_{thja}	Thermal resistance junction to ambient ⁽⁴⁾	SO8	125	°C/W
		TSSOP8	120	
		MiniSO8	190	
		DFN8 2x2	57	
T_{stg}	Storage temperature range	-65 to 150	°C	
ESD	HBM: human body model ⁽⁵⁾	4000	V	
	MM: machine model ⁽⁶⁾	200		
	CDM: charged device model ⁽⁷⁾	1500		
	Latch-up immunity	200	mA	

1. All voltage values, except differential voltage, are with respect to network ground terminal.
2. Differential voltages are the non-inverting input terminal with respect to the inverting input terminal.
3. Guaranteed by design
4. Short-circuits can cause excessive heating and destructive dissipation. Values are typical.
5. According to JEDEC standard JESD22-A114F
6. According to JEDEC standard JESD22-A115A
7. According to ANSI/ESD STM5.3.1

3 Operating conditions

Table 2. Operating conditions

Symbol	Parameter	Value	Unit
V_{CC}^+	Supply voltage	2.7 to 16	V
$V_{icm}^{(1)}$	Common mode input voltage range	0 to $V_{CC}^+ - 1.5$	
	$T_{min} \leq T_{amb} \leq T_{max}$	0 to $V_{CC}^+ - 2$	
T_{oper}	Operating free-air temperature range	-40 to 125	°C

1. The output state is guaranteed as long as one input remains with this common mode input voltage range, and the other input remains between -0.3 V and 16 V (meaning that one input can be driven above V_{CC}^+).

6 Application information (input voltages)

The ESD strategy used in the TSX3702 (and shown in [Figure 3. Schematic diagram \(one operator\)](#)) allows input voltages from -0.3 V up to 16 V to be applied regardless of the V_{CC+} voltage. When $V_{IN} > V_{CC+}$ a leakage current goes from the input through the protection diode to the ESD clamp. This current is about 0.2 nA at 25 °C and about 250 nA at 125 °C. For a detailed input characteristic see [Section 5 Figure 12](#). The device is designed to prevent phase reversal.

7 Package information

In order to meet environmental requirements, ST offers these devices in different grades of **ECOPACK** packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: www.st.com. ECOPACK is an ST trademark.

IMPORTANT NOTICE – PLEASE READ CAREFULLY

STMicroelectronics NV and its subsidiaries (“ST”) reserve the right to make changes, corrections, enhancements, modifications, and improvements to ST products and/or to this document at any time without notice. Purchasers should obtain the latest relevant information on ST products before placing orders. ST products are sold pursuant to ST’s terms and conditions of sale in place at the time of order acknowledgement.

Purchasers are solely responsible for the choice, selection, and use of ST products and ST assumes no liability for application assistance or the design of Purchasers’ products.

No license, express or implied, to any intellectual property right is granted by ST herein.

Resale of ST products with provisions different from the information set forth herein shall void any warranty granted by ST for such product.

ST and the ST logo are trademarks of ST. For additional information about ST trademarks, please refer to www.st.com/trademarks. All other product or service names are the property of their respective owners.

Information in this document supersedes and replaces information previously supplied in any prior versions of this document.
