

MXA2500EL-B Prototyping Board

MXA2500EL-B

GENERAL DESCRIPTION

The MXA2500EL-B provides a convenient and easy way to evaluate and prototype with the MXA2500EL dual axes accelerometer. The accelerometer and passive components are SMT mounted on the board. Each pin of the MXA2500EL SMT device is brought out to standard 0.10 inch on center connections on the sides of the prototyping board. Wires can either be soldered directly to the prototyping board or the DIP pins can be used with widely available breadboard kits.

For complete performance specifications of the MXA2500EL refer to the MXA2500EL datasheet.
