

### GAS DISCHARGE SURGE PROTECTORS

DC to 3000 MHz Operation

The surge protectors offered by Laird Technologies are an integral part of any antenna installation in protecting sensitive equipment from surges caused by lightning. The ultra-fast gas discharge tube design gives quick response to power surges and dumps the excess power safely to the ground. A ground lug terminal is supplied to provide superior grounding. The units have the ability to withstand multiple lightning strikes. The SP3-90-6 passes DC voltage, so it is also suitable for systems that pass DC power through the coax, such as remote amplifiers.
