

Merit Sensor's MULPEK enables you to evaluate both analog and digital LP Series pressure sensors. The evaluation kit includes a PC board, USB cable, essential tubing and tee connectors, and Merit Sensor custom software.

FEATURES

- Analog pressure indicator for LP Series 1410
- USB port for digital display of LP Series 1420
- Screw terminal for evaluating the functionality of LP Series in custom applications
- LP Series 1410 and 1420 pressure sensors* for 0–0.15 PSI included on the PCB
- Software included to interface with the LP Series 1420

* The part numbers included on the PC board are 1410-P15G-11-11 and 1420-P15G-1611-11. For details on these pressure sensors, refer to their applicable data sheets.

Merit Sensor owns and operates a MEMS wafer fab, which enables the production of customized piezoresistive pressure sensors for medical, industrial, and automotive applications. We help you get to market quickly with creative and flexible solutions and provide prompt, personal, and professional customer support.
