

LT3845A: High Voltage Synchronous Buck Controller with Programmable Frequency and Sync

DESCRIPTION

Demonstration Circuit 1619A is a 100kHz to 500kHz programmable frequency, high voltage, current mode DC/DC step-down converter featuring the LT[®]3845A. The operating frequency can be synchronized up to 600kHz. This demo board is designed for 12V up to 10A (120W) output from a 16V to 60V input. A soft-start feature controls the output voltage slew rate at start-up, reducing current surges and voltage overshoots. The modes of operation (Burst Mode[®], discontinuous current mode and continuous current mode) are jumper selectable. Both Burst Mode operation and discontinuous current mode increase the efficiency at light loads. Continuous current mode will maintain a constant switching frequency regardless of the load current.

An optional boost bias circuit is provided on the bottom side of the board for back-driving the LT3845A internal regulator from the output voltage. Customers may want to use this optional circuit with modified applications that have relatively high input voltages and low (~3.3V)

output voltages. In such applications, this optional circuit can increase the overall efficiency by reducing the power loss in the LT3845A. The demonstration board has the option of doubling the number of switching MOSFETs to facilitate higher output current. This board is suitable for a wide range of industrial control systems and telecom power supplies.

The LT3845A data sheet gives a complete description of the part, operation and application information. The data sheet must be read in conjunction with this quick start guide for demo circuit 1619A.

Note: It is best to ground the SYNC pin if the SYNC function is not being used.

Design files for this circuit board are available at <http://www.linear.com/demo>

PERFORMANCE SUMMARY (T_A = 25°C)

PARAMETER FOR BUCK REGULATOR	CONDITION	VALUE
Minimum Input Voltage		16V
Maximum Input Voltage		60V
Output Voltage, V _{OUT}		12V ±2%
Maximum Output Current	V _{IN} < 28V V _{IN} ≥ 28V	7.5A to 10A (See Figure 5) 10A
Typical Switching Frequency	R9 = 49.9k	300kHz
External Clock Synchronous Frequency Range	R9 = 49.9k	325kHz to 600kHz
Efficiency	V _{IN} = 48V, V _{OUT} = 12V, I _{OUT} = 8A	94% (See Figure 3)

QUICK START PROCEDURE

Demonstration circuit 1619A is easy to set up to evaluate the performance of the LT3845A. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

Note: When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple directly across the VIN or VOUT capacitors by soldering leads on the appropriate capacitor. See Figure 2 for proper scope probe technique. An oscilloscope probe can be directly connected to VIN or VOUT using a banana jack to BNC adaptors.

1. Place JP1 in the RUN position.
2. Place JP2 in the desired operating mode: burst, pulse-skipping or continuous.
3. With power off, connect the input power supply to VIN and GND.

4. Turn on the power at the input and adjust the input voltage until the LT3845A turns on.

Note: Make sure that the input voltage does not exceed 60V.

5. Check for the proper output voltage.

Note: If output does not come up, make sure the load is not set too high. Reduce the load and repeat steps 4 and 5.

6. Once the proper output voltage is established, adjust the input voltage and load within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters.

7. An external clock can be added to the SYNC pin when the SYNC function is used. See the Oscillator SYNC section in the data sheet for details.

DEMO MANUAL DC1619A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
