

720 GFX-i Series Sealed and Rugged Keypads

These tough, water resistant keypads feature moving, tactile keys with a responsive 'over-centre' action. Keytop graphics can be easily customized by the use of legend tiles under 'snap-on' transparent keycaps. Once snapped into place the tamper resistant keycaps encapsulate and protect the keytop graphics. These keypads have integral white light LED illumination for use in dark or partially lit locations.

The keypad can be installed on the surface or under the panel.

Fit the supplied silicone seal into the seal groove on the keypad. Use the groove on top for underpanel, and on back for surface fix. The wide part of the seal goes into the groove – see picture below of the seal fitted to the back of the keypad.

To customise the layout place a colour tile and a legend tile onto the key base, and clip the keycap over the top.
