CHIP TYPE THERMISTOR

KT THERMISTOR

Chip thermistors are specially processed, highly reliable thermistors.

They can be face-bonded to act as thermal compensators for ICs and they are manufactured in sizes down to 1 square mm, they can also be used to detect temperature with relatively small time constants.

KT-type Part number

Precautions

• Do not expose the thermistors to high soldering heat for more than specified time. (260°C for not longer than 10s is recommended)

Dimensions

Reflow soldering profile

Taping (1608 type)

Minimum quantity:10000pcs/reel

R2s : Rated zero-power resistance value at 25°C. B value : determined by rated zero-power resistance at 25°C and 85°C. Time when thermistor temperature reaches 63.2% of the temperature difference. The value is measured in the air. Other resistance is available, please ask. *2 *3
