Optional features for DP3T switches

COAXIAL DP3T
RELAYS

GENERAL

RADIALL DP3T / SPDT terminated are designed only with SMA connectors.

For all other connectors (N, BNC etc ..), the same function as SPDT Terminated can be easily performed with a standard DPDT and an external load.

POS 1 : J1 to J2 / J3 to load

Examples of dedicated applications

This SPDT Terminated is composed of a DP3T with SMA connectors and 2 RADIALL cable loads used as medium power terminations. The Key advantage of this solution is the ability to mount the switch with external terminations at power level desired.

This is an example of an SPDT terminated switch that was designed with 2 separate coils for a specific test network application.
