### Occupied Mounting Area

### Features

#### 1. Nominal mated height of 1.18 mm (Max. 1.3 mm)

#### 2. Small board footprint

As with X.FL, W.FL Series, the receptacles occupies an area of 3.4 mm<sup>2</sup> and share the same land pattern.

Note: The W.FL2 Series is not compatible with X.FL, W.FL Series.

#### 3. Extremely light weight

The world's smallest and lightest class of coaxial connectors.

Receptacle: 5.0mg

Right angle plug: 16.7mg(062), 17.4mg(040), 15.3mg(032)

#### 4. Frequency range up to 6 GHz

DC to 3 GHz: V.S.W.R. of 1.3 max.

3 GHz to 6 GHz: V.S.W.R. of 1.4 max.

#### 5. Automatic board placement

Packaged on tape-and-reel the receptacles can be placed with vacuum nozzles of the automatic placement equipment.

#### 6. Plugs are terminated with ultra-fine coaxial (fluorinated resin insulated) cable

The use of ultra-fine coaxial (fluorinated resin insulated) cables on these connectors offer the ability to complete connections in small, confined spaces with a smooth, easy operation.

#### 7. Simple connector mating / un-mating

Use of the available mating / un-mating tools assures correct connection / disconnection of the plug and receptacle.

#### 8. Halogen-free\*(Receptacle, Plug(HF type))

## Precautions

### 1. Plugs

<p>(1) Mating / Unmating</p>	<p>① To disconnect connectors, insert the extraction side of insertion and extraction jig and perform as described in the diagram below.</p> <p><b>• Unmating</b></p>  <p><b>• Mating</b></p> <p>① Align the mating axes of the plug and the receptacle.          ② Confirm that the plug is positioned to be guided. (The both axes are aligned and the plug is positioned stably.)          ③ Remove the tool by carefully pulling it up.</p>  <p><b>● Use of the extraction tool is absolutely mandatory. Any attempt of unmating by pulling on the cable may result in damage and affect the mechanical / electrical performance.</b></p>
<p>(2) Pull forces on the cable after connectors are mated</p>	<p>Do not apply any pull forces after the bending of the cable.</p> 
<p>(3) Precautions</p>	<p>Do not twist connectors excessively during mating / unmating.</p>

### 2. Receptacles

<p>(1) Recommended reflow temperature profile</p>	 <p>① The temperature of the printed circuit board surface temperature at the points of contact with the terminals.          ② Reflow soldering should be performed at a printed circuit surface temperature of 250°C max.          ③ In individual applications the actual temperature may vary, depending on the solder paste type, volume / thickness and board size / thickness. Consult your solder paste and equipment manufacturer for specific recommendations.</p>
<p>(2) Recommended metal mask thickness</p>	<p>0.1 mm to 0.12 mm</p>
<p>(3) Reflow cycles</p>	<p>2 times</p>

### 3. Operating environment and storage conditions

<p>(1) Operating environment</p>	<p>The connectors are not designed to operate in the following environments:</p> <ul style="list-style-type: none"> <li>• Exposed to a excessive amounts of fine particles and dust</li> <li>• Regions and places having a high density of sulfur dioxide, hydrogen sulfide, nitrogen dioxide or other corrosive gasses.</li> <li>• Environments having large rapid variations in temperature.</li> </ul>
<p>(2) Storage conditions - Receptacle</p>	<p>Store in the Hirose Electric packaging.          Temperature: -10 to +40°C, Humidity: 85% max.          Use within 6 months of delivery.          Receptacles for which the storage period has elapsed must be tested for solderability to the PC board mounting surface.</p>
