

FEATURES

- Designed to shield RFID signals to protect against unauthorized contactless access to information stored on a PIV card
- Designed to protect two smart cards against information and identify theft. No need to remove the card from the holder. Smart Cards slide in and the user swivels the card slightly to the left or right to transmit the card's encoded data.
- Designed to provide a barrier to invasive or unwanted communications with the card and puts the user in control of where and when the card is read.
- Meets FIPS 201 SLV.1 Test Requirements
- Made of durable, lightweight vinyl
